Full analysis

Overview

Crédit Agricole Italia is an established retail banking website presenting current accounts, mortgages, insurance, investments, customer assistance, and related financial services. Its apparent purpose is to support ordinary consumer banking relationships rather than promote an opaque investment scheme.

Scam/Impersonation Risk

No contradictions were observed. The homepage identifies Crédit Agricole Italia and presents a coherent banking proposition, with no detected phishing, brand-impersonation, malicious-content, or deceptive-form indicators. External reputation checks were clean, and the site's observed behavior showed no wallet-drainer, cloaking, hidden-form, or clipboard-hijacking activity.

- The homepage title and content identify Crédit Agricole Italia and describe current accounts, mortgages, insurance, and investments.
- The homepage contained no sensitive login form, hidden form, or untrusted form destination.
- External checks recorded zero malicious and zero suspicious detections, with no blacklist finding.

Regulatory Verification Notes

The site presents itself as a banking institution offering deposits, lending, insurance, and investment services. The supplied page evidence does not establish a specific license number or regulatory-register reference, so licensing should be confirmed independently as a transparency matter; this does not constitute evidence of impersonation or fraud. Registration is through Nameshield, and the domain is associated with CREDIT AGRICOLE S.A.

- The domain was registered on 2005-07-01 and is approximately 21.1 years old; registrar: Nameshield.
- Hosted on AS16509 (Amazon.com, Inc., US).
- TLS certificate issued by DigiCert EV RSA CA G2, validation level EV, subject organization Credit Agricole Italia S.p.A., valid to 2027-01-05.

What to Verify Next

Before regulated onboarding or material financial activity, confirm the relevant entity and authorization directly through the applicable Italian or European regulatory register, and validate official contact and service channels through an independently obtained institutional source.

- The homepage provides extensive banking-product and customer-assistance information.
- The supplied page evidence records no license number or named licensing authority.
- The site uses standard cookie-consent and privacy-control mechanisms for analytics and marketing preferences.

Summary Verdict

The website presents as a legitimate, established, high-trust banking institution with a coherent identity, clean reputation, mature domain history, and no observed contradiction or impersonation signal. Normal interaction, including account login and standard banking use, is appropriate.

Infrastructure Integrity

The site is served through Amazon infrastructure on AS16509, with observed edge addresses protected by a CDN/WAF layer and no origin candidate identified. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although it is not independently proof of legitimacy.

Closing Assessment

Standard banking interaction is appropriate, with independent regulatory confirmation recommended as part of normal due diligence for material financial relationships.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about credit-agricole.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
