## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

The website is the Polish Credit Agricole Bank homepage, presenting a full-service retail, business, corporate, and agricultural banking offering intended to support accounts, financing, payments, savings, investments, insurance, and customer service.

### Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent banking identity, contains no detected phishing or impersonation indicators, and shows no sensitive form or untrusted submission destination. External reputation checks recorded no malicious or suspicious findings, while the site's established registration history further supports continuity of identity.

- Domain registered on 2002-04-19 and approximately 24.3 years old.
- Archive record: 1 snapshot dated 2022-10-24, spanning 1 tracked year.
- Homepage analysis found no brand-impersonation, phishing, hidden-form, or malicious-behavior indicators.
- External reputation results recorded 0 malicious and 0 suspicious detections; blacklist status was negative.

### Regulatory Verification Notes

The site describes a conventional banking business model supported by detailed product pricing, representative APR examples, legal information, identifiable contact channels, and security and privacy content. Its pages cover accounts, loans and mortgages, credit cards, savings, investments, insurance, mobile banking, and business services. The supplied pages do not establish a license number or named licensing authority; this is a verification gap rather than an identity contradiction. The available broker-context check produced no match.

- Hosted on AS24756, LUKAS-BANK-AS – Credit Agricole Bank Polska S.A., Poland.
- TLS certificate issued by Certum DV TLS G2 R39 CA, validation level DV, valid through 2026-11-22.
- Homepage contains legal-information, pricing, security, privacy, and contact pathways.
- The third-party broker-context dataset recorded no match.

### What to Verify Next

Before entering into a material financial relationship, the applicable Polish regulatory authorization should be confirmed through the relevant official register, and the institution's contact channels should be cross-checked through an independent offline or previously established route.

- The homepage identifies personal, business, corporate, and agricultural banking audiences.

- Product pages provide pricing and representative APR information.
- Legal, security, privacy, and contact pathways are available from the site.

Summary Verdict

The website presents as a legitimate, established, and trustworthy banking institution with no observed scam or impersonation contradictions. Normal interaction, including account login and standard account activity, is appropriate.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful mitigating layer for exposure and traffic filtering. Observed traffic included four Cloudflare edge addresses and one potential origin candidate; this infrastructure supports resilience but is not, by itself, proof of legitimacy.

- Cloudflare CDN/WAF protection detected.
- Four observed edge IPs were associated with AS13335.
- Infrastructure resolution completed successfully, with 5 unique IPs observed.

Closing Assessment

Standard banking interaction is appropriate, with ordinary institutional controls applied to unusually consequential transactions.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 76/100 |
| Identity verification confidence | 76%    |

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of credit-agricole.pl.

- The request stayed on credit-agricole.pl. It was not redirected to another domain. CLEAR
- Registration is published under Nameshield. CLEAR
- DNS for this domain is served by akam.net, across 4 name servers. NOTED
- The registration is paid up to 2027-04-18. NOTED
- The earliest public archive of this site is from 2022-10-24. CLEAR
- It is hosted on LUKAS-BANK-AS, from a server in PL. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about credit-agricole.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
