Full analysis

Overview

Creditas is a Brazilian digital financial-services platform presenting credit, financing, insurance, and related services for individuals, businesses, and partners, with loan simulation and mobile-app access as central customer journeys.

Scam/Impersonation Risk

No contradictions were observed across the supplied identity, content, behavioral, historical, and reputation signals. The homepage presents a coherent Creditas financial-services identity, contains no detected phishing or brand-impersonation indicators, and explicitly warns that the company does not request advance payment for loan approval. External reputation checks found no malicious or suspicious findings, while the domain has an established public traffic footprint. The available historical record also shows continuity rather than suspicious repurposing, supporting the conclusion that this is the legitimate Creditas website.

EVIDENCE

- Homepage: coherent Creditas branding, financial-services content, loan simulation, app promotion, and an explicit warning against advance-payment requests.
- Domain history: registered 2009-03-31 (archive-reconciled domain age 23.518 years); 363 archive snapshots spanning 2003-02-02 through 2026-07-23, across 24 tracked years.
- External reputation: malicious detections 0, suspicious detections 0, and no phishing or blacklist finding in the supplied checks.
- Historical analysis: no suspicious repurposing or semantic drift was identified.

Regulatory Verification Notes

The site provides substantive corporate and product disclosures, including CNPJs, an office address, regulatory references, and descriptions of its role as a correspondent bancário and Sociedade de Crédito Direto. Its stated business model covers vehicle-, property-, and payroll-backed lending, vehicle and property financing, insurance products, and corporate benefits; the homepage also presents a vehicle-secured credit amount of up to R\$ 150,000 and promotes the claim of offering “the lowest market rate.” These are regulated financial activities and should be assessed against the specific product terms and applicable Brazilian requirements. The supplied evidence does not independently verify a license number or regulatory registration, so licensing remains a routine verification point rather than an indication of illegitimacy. A third-party broker-dataset check produced no match and is contextual only.

EVIDENCE

- Legal and corporate pages: CNPJs, office address, regulatory references, and corporate information are present.
- Homepage and product pages: lending, financing, insurance, and corporate-benefit offerings are

About this assessment

A trust score summarises the evidence TrustSniffer could collect about creditas.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
