

Is creditienda.mx legit? TrustSniffer's high-trust assessment: 100/100

creditienda.mx

Verdict

100

OUT OF 100

HIGH TRUST

creditienda.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Spanish-language CrediTienda retail storefront displaying a broad product catalog with sale prices and payment amounts spread across 24 biweekly installments. No login, sensitive form, cryptocurrency activity, guaranteed-return claim, or clear phishing behavior is evident in the supplied page content.

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

CrediTienda is a Spanish-language ecommerce storefront offering consumer goods across electronics, appliances, clothing, household, health, and related retail categories, with purchases presented through sale pricing and payment schedules of 24 biweekly instalments.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behaviour, malicious reputation findings, or other scam indicators were observed. The long-established domain, continuous archival record, stable browser behaviour, and clean external threat reputation converge with the coherent retail content to support the site's legitimacy. No login form, hidden form, sensitive-data collection mechanism, cryptocurrency feature, guaranteed-return claim, or deceptive redirection was identified in the supplied homepage analysis.

- The domain registration record confirms registration in 2018 (~8.21 years old), with creation on 16 May 2018 and current registration through AKKY ONLINE SOLUTIONS, S.A. DE C.V.
- The web archive contains 154 snapshots spanning 17 July 2019 to 19 May 2026 (8 years tracked), with no detected suspicious repurposing or semantic category conflict.
- Homepage inspection found no login form, hidden form, sensitive form, untrusted form destination, cryptocurrency mechanism, cloaking, clipboard interference, or suspicious inline script.
- External reputation checks recorded zero malicious and zero suspicious detections, no phishing finding, no reported abuse, and an established top-one-million traffic presence.

Regulatory Verification Notes

The supplied homepage does not expose a legal-entity statement, corporate registration details, financing-policy text, or a claimed regulatory licence. For a general retailer, the absence of a licence claim is not inherently adverse; however, the commercial terms governing instalment purchases, total payable amount, fees, late-payment consequences, cancellation, returns, delivery, and dispute handling should be available before a financed purchase is completed. No conflicting legal-entity names were found, and the absence of a match in the broker-intelligence dataset has no bearing on the retailer's legal or regulatory status.

- The homepage presents product descriptions, discounts, and periodic payment amounts but the supplied text does not include the underlying financing agreement or consumer-contract terms.
- The supplied page content does not identify a licensing authority or licence number and makes no claim of regulated financial status.

- The site's transport encryption uses a domain-validated certificate issued by Go Daddy Secure Certificate Authority - G2, valid until 9 December 2026.
- The registration record identifies Eduardo Blanco Montaña as the domain owner and shows expiry on 16 May 2027.

What to Verify Next

Before entering an instalment transaction, the purchaser should review the checkout-stage contract for the total cash and financed prices, applicable interest or fees, payment schedule, default consequences, cancellation rights, warranty coverage, delivery commitments, and dispute process. The contracting entity and payment recipient should match the names shown in those terms and in the transaction confirmation. Official customer-service channels should also be confirmed through the site's contractual or order documentation.

- The homepage's retail presentation provides prices and payment amounts, making the complete pre-contract cost disclosure material to an informed purchase decision.
- No sensitive form or checkout contract was present in the supplied page view, so transaction-stage disclosures could not be assessed from that page.
- The observed browser sessions completed successfully without console errors, hidden-form activity, suspicious scripts, or anomalous outbound submission destinations.

Summary Verdict

CrediTienda is a legitimate, established, and trustworthy ecommerce website. Its coherent commercial purpose, durable operating history, clean security reputation, and benign observed behaviour provide mutually reinforcing evidence of authenticity, with no contradictory risk signals. Normal interaction, including account login and standard purchases, is appropriate.

Infrastructure Integrity

The site resolves directly to a Google Cloud Platform address rather than operating behind a detected CDN or WAF. This mainstream hosting environment and valid encrypted transport support technical integrity, although hosting infrastructure alone is not proof of business legitimacy.

- The hosting infrastructure is served from AS396982 (Google Cloud Platform — Google LLC, US).
- DNS resolution identified one US-based address, 35.244.167.176, as the likely origin, with no separate edge address detected.

Closing Assessment

Prospective customers may use the site normally, while applying standard ecommerce due diligence by reviewing the complete transaction terms and retaining purchase and payment records.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
No on-site identity signals detected	
Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.	
What TrustSniffer observed	
First-party facts recorded during the assessment of creditienda.mx.	
- The request stayed on creditienda.mx. It was not redirected to another domain. CLEAR - Registration is published under AKKY ONLINE SOLUTIONS, S.A. DE C.V.. CLEAR - DNS for this domain is served by googledomains.com, across 4 name servers. NOTED - The registration is paid up to 2027-05-16. NOTED - The earliest public archive of this site is from 2019-07-17. CLEAR - It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about creditienda.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
