

Is criminallawtracker.com a scam? TrustSniffer's high-risk assessment: 0/100

criminallawtracker.com

Verdict

0

OUT OF 100

CRITICAL RISK

criminallawtracker.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be	Domain parking/expired-domain landing page from Namecheap indicating the domain criminallawtracker.com has expired, with renewal instructions and links to domain auctions.
------------------------------	---

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://criminallawtracker.com/>

What criminallawtracker.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Namecheap-operated parked and expired-domain landing page for criminallawtracker.com, presenting renewal instructions to a registrant and domain-auction listings rather than a functioning legal-information or commercial service; its apparent purpose is domain renewal, resale, and parking monetization.

Scam/Impersonation Risk

The site's current content does not establish an operating legal-information service or independently connect the domain to a real-world organization. No conflicting legal identities or page-level brand impersonation were observed; however, the domain is **blacklisted**, with malicious detections corroborated by multiple external security providers. This is a material contradiction to treating the domain as suitable for login, credential, or financial interaction. Behavioral telemetry also showed network and page-structure activity inconsistent with the low-complexity parked-page presentation, including substantial external requests, non-whitelisted traffic, and significant DOM changes after interaction.

EVIDENCE

- External reputation assessment recorded 12 malicious detections and 1 suspicious detection from 18 evaluated results; Fortinet, Kaspersky, and Sophos were among the flagged providers, with blacklist sources including VT and EXTERNAL_BLACKLIST.
- Interaction telemetry recorded 34 external XHR requests, 21 external posts, 8 non-whitelisted XHR requests, and 10 non-whitelisted posts across two successful runs.
- The browser environment recorded 38 console errors and a maximum post-interaction DOM difference of 2692, while classifying cloaking as none.
- Historical domain telemetry records first observation on 2021-11-28T22:49:27Z, last observation on 2025-07-11T07:51:48Z, and 5 years tracked; no repurposing or semantic drift was identified.

Regulatory Verification Notes

The available page is a registrar parking page rather than an operating legal or financial service and makes no licensing, registration, or regulated-entity claim. Consequently, there is no on-page basis to validate a service provider, professional authorization, or responsible legal entity. The domain's identity remains unverified, and the absence of a broker-dataset match provides contextual information only; it is not evidence of authorization or misconduct.

EVIDENCE

- Domain registration telemetry records creation on 2023-07-10T17:04:23Z, a continuity age of 4.643394934976044 years, registrar NAMECHEAP INC, and expiry on 2027-07-10T17:04:23Z.
- Hosting telemetry identifies AS49981, WorldStream - WorldStream B.V., NL.
- The site's transport encryption uses a DV certificate issued by YE2, valid to 2026-11-09T11:28:11+00:00.
- The homepage contains renewal instructions and auction functionality but no legal-entity, license-number, or regulated-service disclosure.

What to Verify Next

Any proposed engagement should first be tied to a separately confirmed operator and a clearly defined business purpose. An independent corporate or professional registry should be used to validate any purported legal-service or financial-service entity, and any domain-management request should be confirmed through the registrar's independently accessed account portal rather than through page-provided prompts. Credential or payment activity should remain suspended unless those checks produce a consistent, independently sourced identity.

EVIDENCE

- The assessed page is categorized as a parked/domain-auction landing page, not as an active legal-information or financial-service website.
- The available identity-verification result contains no independent brand, person, or organization signal.
- The broker-reputation lookup returned no match; this is contextual only and does not establish licensing or legitimacy.

Summary Verdict

The overall posture is **critical trust risk**, driven by corroborated external malicious and blacklist signals that outweigh the site's ordinary registrar-page presentation and basic transport security. The domain should not be treated as an established or verified service identity, and sensitive interaction is not appropriate.

Infrastructure Integrity

The site resolves directly through WorldStream - WorldStream B.V. in the Netherlands, with no CDN detected and two likely origin addresses identified. Direct origin exposure does not itself establish maliciousness, but it provides no protective CDN layer to offset the confirmed reputation concerns.

EVIDENCE

- Infrastructure telemetry identifies two unique IP addresses, zero edge IP addresses, and two likely origin IP addresses.
- The resolved hosting network is AS49981, WorldStream - WorldStream B.V., NL.

Closing Assessment

The appropriate operational response is to restrict activity to passive observation and escalate any intended credential, account, or financial transaction for independent security and identity validation before proceeding.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of criminallawtracker.com.

- The request stayed on criminallawtracker.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NAMECHEAP INC. [CLEAR](#)
- DNS for this domain is served by registrar-servers.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-07-10. [NOTED](#)
- The earliest public archive of this site is from 2021-11-28. [CLEAR](#)
- It is hosted on WorldStream, from a server in NL. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about criminallylawtracker.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
