What crisfooddigiiverse.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Crisfood DigiVerse presents itself as a Bhiwandi-based digital marketing and web/application development agency, offering industry-specific solutions, portfolio projects, client testimonials, and contact details; its apparent business model is the provision of marketing, design, website, and mobile-application services to commercial clients.

Scam/Impersonation Risk

Material external threat indicators override the otherwise conventional agency presentation. The domain is reported as blacklisted by two sources, and 17 evaluated detections classified it as malicious, including detections from Fortinet, Kaspersky, and Sophos. These findings establish a significant contradiction between the site's benign portfolio narrative and its external security reputation. No brand-impersonation or phishing form was identified in the visible page analysis, and the site did not present login, password, wallet-connection, or other sensitive forms; those content-level observations do not offset the confirmed external detections.

Evidence:

- The external reputation assessment recorded 17 malicious detections and identified Fortinet, Kaspersky, and Sophos among the flagged vendors.
- The domain was recorded as blacklisted by external sources, with the associated protective response activated.
- The homepage was categorized as an agency/portfolio page with no detected login form, hidden form, password-external form, or wallet-drainer behavior.

Regulatory Verification Notes

The visible site describes a commercial agency and provides an office location and contact information, but independent identity verification remains incomplete. The pages reviewed do not state a licensing authority or license number; for an ordinary marketing and development agency this is principally a disclosure and business-verification matter, not by itself evidence of criminal conduct. The site's use of a Domain-Validated TLS certificate confirms encrypted transport, but does not establish the operator's legal identity, licensing status, or authorization to conduct any regulated activity. Evidence:

- The homepage and contact content identify Crisfood DigiVerse as a digital marketing and development agency based in Bhiwandi and present contact and office information.
- No license claim, licensing authority, or license number was identified in the reviewed site content.
- The domain was registered on 2023-04-10 and is approximately 3.36 years old; the registrar is GoDaddy.com, LLC.
- TLS is issued by WE1 at DV validation level and is valid through 2026-10-31.

What to Verify Next

Before any sensitive interaction, an enterprise or prospective client should independently confirm the agency's legal registration, operating address, and contracting entity through authoritative business records; validate the published contact channels through an independently sourced route; and obtain a security review or vendor-risk exception decision addressing the external malicious detections. No credentials, confidential files, payment details, or privileged access should be provided unless those checks produce a documented resolution. Evidence:

- The site's About, Contact, and portfolio content provides an apparent business identity and service history but does not independently verify the contracting entity.
- The homepage contains no sensitive submission form, so an initial review can remain limited to publicly visible content.
- The site returned successfully during two behavioral runs, while four observed external network requests were classified as non-whitelisted; this warrants review of the site's dependencies before technical integration.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The apparent small-agency business model and benign visible content are outweighed by corroborated external malicious and blacklist indicators, while the real-world operator remains unverified.

Infrastructure Integrity

The website is delivered through Cloudflare's CDN/WAF infrastructure, with all observed addresses belonging to CDN edge servers and no origin candidate visible in the analysis. This provides a meaningful layer of traffic

filtering and origin shielding, but it is only a mitigating infrastructure characteristic and cannot resolve the site's external reputation contradiction. Evidence:

- Hosted on AS13335, CLOUDFLARENET—Cloudflare, Inc., US.
- Four observed edge IPs were associated with AS13335; zero likely origin IPs were identified.
- The site's transport encryption uses a DV certificate issued by WE1, valid to 2026-10-31.

Closing Assessment

The appropriate disposition is read-only observation pending independent business validation and a documented security determination; sensitive access, credentials, confidential data, and financial interaction should remain withheld.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of crisfooddigiverse.com.

- The request stayed on crisfooddigiverse.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-04-10. CLEAR
- The earliest public archive of this site is from 2023-07-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about crisfooddigiverse.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
