Full analysis

Overview

This is a local integrative-therapy website for Cris Salles Terapias – Naturoterapia, presenting wellness services, practitioner information, explanatory material, and contact options intended to generate appointment enquiries through WhatsApp and site contact details.

Scam/Impersonation Risk

No phishing, brand-impersonation, malicious-behaviour, or other contradictory indicators were observed across the homepage, service content, and contact pathway. The site behaves as an informational local-business service: testing identified no login form, sensitive data form, wallet interaction, external posting, cloaking, or credential-collection mechanism. The available evidence therefore supports an apparently legitimate, low-risk presentation, while the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies “Cris Salles Terapias” and presents integrative-therapy content without payment or credential-collection functionality.
- The contact pathway offers appointment enquiries through WhatsApp and site contact details; no phishing or brand-impersonation indicators were identified.
- The domain was registered on 2020-08-20 and is approximately 6 years old.
- Historical records contain 9 archive snapshots spanning 2021–2025, representing 5 years tracked.

Regulatory Verification Notes

The site describes Reiki, auriculotherapy, yogatherapy, chromotherapy, reflexology, and Barra de Access, including claims concerning physical, emotional, energetic, and wellbeing benefits. No professional license, registration number, or regulatory authority is presented in the reviewed content, making the applicable authorization status a transparency matter requiring ordinary sector-specific confirmation rather than evidence of deception. The site’s operator identity is not independently verified, and the available third-party business-reputation context contains no matched broker signal.

EVIDENCE

- The services and practitioner biography are presented on the “Terapias Integrativas” and “Sobre Nós” content areas, with no license or registration number displayed.
- The site’s hosting infrastructure is AS47583, operated by AS-HOSTINGER – Hostinger International Limited, CY.
- The site’s transport encryption uses a DV TLS certificate issued by YE1, valid to 2026-11-12.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the practitioner’s legal identity and the official appointment channels using a known offline or independently sourced contact route. The relevant Brazilian professional or municipal requirements for the advertised services should be checked where applicable, together with the practitioner’s qualifications and the scope of any health-related claims. Any payment should be made only after confirming the responsible merchant, cancellation or refund terms, and available payment protection.

EVIDENCE

- The “Sobre Nós” and “Contato” pages provide the appropriate locations for identity and appointment-channel confirmation.
- The service descriptions make health and wellbeing-related claims, so qualifications and applicable local requirements are material verification points.
- The reviewed site presents no visible credential or payment form, reducing immediate exposure during ordinary informational browsing.

Summary Verdict

The website presents an established, apparently legitimate local service with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The classification is well supported by the convergence of coherent site content, stable benign behaviour, established registration continuity, and clean available reputation signals, but it does not independently prove the operator’s real-world identity.

Infrastructure Integrity

The site is hosted directly through Hostinger’s AS47583 infrastructure in Ukraine, with no CDN detected and likely origin addresses visible. This is a conventional, identifiable hosting arrangement and provides useful technical traceability, although hosting infrastructure alone is only a mitigating signal and does not establish legitimacy.

Closing Assessment

Ordinary informational use is proportionate to the available evidence; identity, applicable professional requirements, and payment protections should be confirmed independently before any sensitive or financial interaction.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about crissallesterapias.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
