

Is crypto.net.id legit? TrustSniffer's high-trust assessment: 100/100

crypto.net.id

Verdict

100

OUT OF 100

HIGH TRUST

crypto.net.id appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate homepage for an IT system integrator and managed-services provider offering network design, infrastructure deployment, software development, security monitoring, maintenance, and support. Despite the company name containing "Crypto," the supplied content does not concern cryptocurrency.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a corporate presence for an Indonesian business-to-business system integrator and managed-services provider, presenting network design, infrastructure deployment, application development, security monitoring, maintenance, consultancy, and technical-support services rather than cryptocurrency products or online financial services.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other substantive fraud indicators were observed. The domain has a long-established registration and a continuous historical web presence without evidence of repurposing or material semantic drift. External reputation checks were clean, while observed browser activity showed no credential capture, cloaking, wallet interaction, clipboard manipulation, or unexplained external data transmission. The word “Crypto” in the company branding does not indicate a digital-asset business in the supplied content.

- The domain registration record shows registration on 29 June 2012 (~14.09 years old), with expiry on 29 June 2027.
- Historical records contain 52 archive snapshots spanning 12 August 2013 to 8 February 2026, covering 14 tracked years without suspicious repurposing.
- External reputation telemetry recorded zero malicious and zero suspicious detections, no harmful-site finding, no abuse reports, and a global traffic rank of 187,363.
- The corporate homepage contained no login form, sensitive form, hidden form, financial-payment request, wallet-connect function, or cryptocurrency token offering.

Regulatory Verification Notes

The site describes a conventional corporate IT-services model rather than an activity that inherently requires financial-services licensing. No financial license is claimed, and the supplied homepage does not establish a specific corporate registration number or identify a licensing authority; this is therefore a disclosure-verification matter, not evidence of deception. The homepage states that the business has achieved ISO 9001:2008 and offers maintenance, warranty, rapid fault response, and temporary replacement modules, but the supplied material does not include supporting certification details. No adverse broker-profile match was identified.

- The homepage identifies the business as a system integrator and managed IT-services provider focused on infrastructure, applications, consultancy, security, maintenance, and support.
- The domain is registered through Asosiasi Penyelenggara Jasa Internet Indonesia.

- The site is served from AS46061 by AIM-AS-ID – PT. Adi Inti Mandiri, Indonesia; its DV TLS certificate was issued by YE2 and is valid until 16 October 2026.
- The homepage claims ISO 9001:2008 attainment but does not display a certificate identifier, certification body, or current certification status in the supplied text.

What to Verify Next

Enterprise onboarding should confirm the legal contracting entity through Indonesian corporate records, validate the claimed quality certification with its issuing body, and obtain written service-level, warranty, replacement-equipment, and escalation terms. Procurement teams should also independently confirm customer references and official commercial contact channels before executing a material services agreement.

- The homepage advertises an “Uptime 100% Guarantee,” creating a clear basis for requesting the contractual measurement method, exclusions, and remedies.
- The homepage promises 24-hour online service and immediate replacement modules from a logistics depot while defective parts are repaired.
- The homepage presents a customer-service proposition across multiple market segments but supplies no pricing or online purchasing mechanism.
- The observed site provides informational corporate content without initiating external posts, external requests, or sensitive-data collection.

Summary Verdict

The website presents as a legitimate, established, and trustworthy corporate IT-services presence. Its longstanding provenance, stable business identity, clean reputation, benign behavior, and coherent service offering converge strongly in support of normal interaction, including account login and standard use where such functions are available.

Infrastructure Integrity

The site uses direct Indonesian hosting rather than a CDN or WAF, with one resolved address appearing to be the origin server. Its valid transport encryption and identifiable network operator provide sound baseline integrity, although direct origin exposure offers less perimeter abstraction than an edge-protected deployment.

Closing Assessment

Normal engagement is appropriate, with standard enterprise procurement and counterparty due diligence applied before contractual commitment.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of crypto.net.id.

- The request stayed on crypto.net.id. It was not redirected to another domain. CLEAR
- Registration is published under Asosiasi Penyelenggara Jasa Internet Indonesia. CLEAR
- DNS for this domain is served by net.id, across 2 name servers. NOTED
- The registration is paid up to 2027-06-29. NOTED
- The earliest public archive of this site is from 2013-08-12. CLEAR
- It is hosted on AIM-AS-ID, from a server in ID. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about crypto.net.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
