

Is cryptobubbles.net legit? TrustSniffer's high-trust assessment: 90/100

cryptobubbles.net

Verdict

90

OUT OF 100

HIGH TRUST

cryptobubbles.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

Crypto Bubbles is a market-information dashboard that ranks and visualizes cryptocurrency prices, capitalization, volume, and percentage performance across several time periods. The page includes token-specific buy links, advertising for a crypto casino, exchange partner promotions, app-store links, social channels, contact information, a privacy link, and a financial-advice disclaimer.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Crypto Bubbles is an established cryptocurrency market-information website that visualizes token prices, market capitalization, trading volume, and performance across multiple time horizons, serving primarily as an informational dashboard rather than an investment custodian or transaction platform.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or confirmed malicious reputation signals were observed. The homepage contains no login, password, wallet-connect, or other sensitive-input form, and testing found no wallet-drainer, clipboard-hijacking, cloaking, or hidden-form behavior. The long-established domain, substantial global traffic footprint, and clean external reputation converge strongly in support of the site's legitimate identity.

- The domain registration record shows registration through Amazon Registrar, Inc. on 12 March 2019: Registered 2019 (~7.39 years old), with expiration on 12 March 2027.
- External threat screening recorded 0 malicious and 0 suspicious detections, no phishing indication, no confirmed malicious listing, and no abuse reports for the observed infrastructure.
- The homepage contains 0 forms, no sensitive form fields, no hidden forms, and no detected brand-impersonation indicators.
- The domain holds a global traffic rank of 44,540, placing it within the top one million sites.

Regulatory Verification Notes

The site operates as a market-data utility supported by advertising and partner referrals. Its homepage provides token-specific “Buy” links, promotes cryptocurrency exchanges, and carries an advertisement for a crypto casino; these are commercial outbound pathways, while the site itself is not presented as accepting investments or controlling customer funds. A financial-advice disclaimer and privacy reference are present. No financial-services licence is claimed in the assessed content, which is consistent with the stated informational model but does not establish the regulatory status of independently operated services reached through promotional links.

- The homepage describes and displays cryptocurrency price, capitalization, volume, and percentage-performance information rather than deposit, custody, or portfolio-management services.
- The homepage includes a financial-advice disclaimer and a reference to a privacy policy alongside commercial promotions.

- The site's transport encryption uses a DV certificate issued by Alibaba Cloud GCC R46 AlphaSSL CA 2025, valid to 20 February 2027.
- The site is served from AS13335 (Cloudflare, Inc., US).

What to Verify Next

Before following a “Buy” control or promotional offer, the destination domain, operator identity, applicable terms, fees, jurisdiction, and regulatory status should be checked independently because those services are separate from the dashboard. Mobile applications should be matched to the publisher identity shown in the official application store, and official social or contact channels should be confirmed through an independent route when used for support.

- The homepage places “Buy” controls beside individual assets, creating direct handoffs from neutral market information to third-party commercial services.
- The homepage presents app-store links and social channels on X and Telegram, each requiring destination and publisher validation outside the site.
- The displayed casino promotion introduces a gambling-service destination with a risk and regulatory profile distinct from the site's informational function.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across domain tenure, traffic adoption, clean threat reputation, substantive informational content, and stable technical operation. No contradictory evidence undermines its stated identity or purpose, and normal interaction, including account login and standard use where available, is appropriate.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF layer, with all four observed addresses belonging to edge infrastructure. This limits direct exposure of the origin server and provides a meaningful defensive control, although protective hosting is a mitigating security signal rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage with the site normally, while applying standard due diligence whenever an interaction transfers to an independently operated external service.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cryptobubbles.net.

- The request stayed on cryptobubbles.net. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-12. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cryptobubbles.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
