Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established cryptocurrency news and analysis portal presenting market prices, breaking news, educational guides, reviews, market tools, podcasts, sponsored material, and affiliate-oriented recommendations for crypto products and gambling services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent informational-media purpose, with no detected phishing, impersonation, malicious content, or suspicious interactive behavior. Its commercial model is consistent with advertising, sponsorships, partnerships, and affiliate relationships rather than requesting user deposits, and the only observed form is an email newsletter form without a sensitive destination.

- Homepage: no brand-impersonation or phishing indicators were detected.
- Homepage: no sensitive login, password, wallet, or payment form was observed.
- Domain registration: registered 1999; approximately 27.41 years old.
- External reputation: no malicious or suspicious detections, with the domain listed among the global top one million by traffic.

Regulatory Verification Notes

The site operates as editorial and commercial media rather than presenting itself as a licensed financial institution. Its pages cover Bitcoin, Ethereum, Solana, DeFi, NFTs, wallets, exchanges, crypto futures, casinos, betting, and “no KYC” services; they also display a “Get up to \$1,190 Welcome Rewards” promotion. These features warrant ordinary separation between editorial content, sponsored material, affiliate recommendations, and regulated financial advice. No confirmed third-party broker association was identified. Licensing or corporate-registration information is unclear in the supplied disclosures, which is a transparency point for institutional due diligence rather than evidence of deception.

- Homepage: identifies news, analysis, education, reviews, sponsored content, advertising, and affiliate-linked recommendations as core activities.
- Homepage: displays market coverage for BTC, ETH, SOL, PEPE, SHIB, DOGE, and XRP.
- Hosting and registration telemetry: registered through SafeNames Ltd.; served on AS13335 (Cloudflare).
- TLS telemetry: certificate issued by WE1 using DV validation, valid through 2026-09-10.

What to Verify Next

For regulated or high-value engagements, confirm the relevant legal entity, jurisdiction, and any applicable licensing directly with the competent registry; separately confirm that sponsored and affiliate recommendations are clearly identified and that commercial counterparties are independently vetted.

- Homepage: includes sponsored and affiliate-oriented sections alongside editorial content.
- Homepage: contains recommendations spanning exchanges, wallets, futures platforms, casinos, and betting services.
- Homepage: provides a newsletter signup rather than a transactional deposit workflow.

Summary Verdict

The website presents a high-confidence established-media profile with a legitimate business purpose and no observed scam or impersonation contradiction. Its overall trust posture supports normal interaction, including account login and standard use, while commercial recommendations should remain subject to ordinary institutional diligence.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN/WAF, with observed traffic terminating on Cloudflare edge infrastructure rather than directly exposing an origin address. This reduces routine infrastructure exposure and is a mitigating security control, not independent proof of legitimacy.

Closing Assessment

Normal browsing, login, and standard account interaction are appropriate; regulated or financially consequential engagements should follow the organization’s standard vendor and counterparty verification procedures.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cryptonews.com.

- The request stayed on cryptonews.com. It was not redirected to another domain. CLEAR
- Registration is published under SafeNames Ltd.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2032-03-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cryptonews.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
