Full analysis

Overview

This website is an informational site for the Anhui Tea Culture Research Association, presenting association governance, membership information, announcements, tea-culture research, industry news, training programs, and contact details. Its apparent purpose is to support a non-profit cultural and professional association rather than sell goods, solicit investments, or provide financial services.

Scam/Impersonation Risk

No contradictions were observed. The site consistently presents one cultural-association identity, and the available page content contains no phishing indicators, impersonation signals, sensitive login forms, financial solicitation, or suspicious transaction mechanics. The contact, organizational, and informational content is internally consistent with a non-commercial association website. The domain and observed historical continuity further support an established web presence, although they do not independently verify the real-world operator.

EVIDENCE

- The homepage identifies the Anhui Tea Culture Research Association and provides association news, notices, membership information, training content, and contact details.
- The homepage contains no login form, hidden sensitive form, wallet interaction, or external password-submission destination.
- The domain was registered on 2017-02-28 and is shown as approximately 9.48 years old.
- Archive records show 56 snapshots spanning 2018-08-04 to 2026-05-14, with 9 years tracked.

Regulatory Verification Notes

The association overview, organizational pages, constitution, and contact page present the entity as a non-profit social organization with independent legal-person status. The site also displays an ICP filing reference, a physical address in Hefei, and a telephone contact. These are meaningful on-page disclosures, but the real-world operator identity remains independently unverified; the site's own claims should therefore be treated as apparent rather than conclusive. No separate regulatory licence is claimed, which is appropriate to verify only if the association requests fees for training, membership, or related services. A clean external reputation signal supports the site's low-risk presentation but is not a legal or licensing determination.

EVIDENCE

- The site's overview page describes the association as an academic, non-profit social organization with independent legal-person status.
- The constitution, organization, membership, and training sections provide substantive association-related content rather than financial-service or e-commerce disclosures.
- The hosting infrastructure is AS37963, ALIBABA-CN-NET — Hangzhou Alibaba Advertising Co., Ltd., CN.
- The site's TLS certificate is issued by YR1, uses Domain Validation (DV), and is valid to 2026-10-25 05:18:26 UTC.

What to Verify Next

Before any credential or payment interaction, an organization considering engagement should independently confirm the association's legal existence and current office-bearers through the relevant Chinese public or sector registry. Any membership or training fee should be matched against written terms, a documented refund or cancellation process, and payment protections. Contact details should also be confirmed through an independently sourced institutional channel rather than relying solely on information presented on the website.

EVIDENCE

- The association overview and organization pages identify the entity, governance structure, and stated institutional purpose for independent comparison with an official registry.
- The membership and training pages identify the areas in which fees or enrollment conditions may require clarification.
- The contact page provides the institutional contact route that can be cross-checked through an independent source.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate informational association website. No scam, phishing, impersonation, or identity-contradiction signal was observed, while independent confirmation of the real-world operator remains outstanding.

Infrastructure Integrity

The site is hosted directly through Alibaba Cloud infrastructure under AS37963, with one resolved likely origin address and no CDN detected. This is a technically coherent hosting arrangement and provides a mitigating infrastructure signal, but hosting configuration alone does not establish the operator's identity or legitimacy.

Closing Assessment

Normal informational use is proportionate; before credentials or payments are involved, ordinary independent checks of the operator, applicable terms, and payment protections should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cwhyjh.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
