

Is cybermati.co.uk a scam? TrustSniffer's high-risk assessment: 0/100

cybermati.co.uk

Verdict

0

OUT OF 100

CRITICAL RISK

cybermati.co.uk shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing/landing page for 'cyber MATI', an AI-based anti-phishing product. Contains product messaging, a phishing risk calculator UI text, contact email, and social links. No sign-in, payment, or investment flows are present in the captured HTML.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.		
Malware engines	16 flagged it VirusTotal	RISK
Google Safe Browsing	Listed as unsafe Google	RISK
Abuse reports on the host	0% confidence AbuseIPDB, 1 report; shared hosting inflates reports	CLEAR

The page as captured

<https://cybermati.co.uk/>

What cybermati.co.uk served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Google, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

cyber MATI is a product landing website for an AI-powered anti-phishing solution aimed at enterprises. It presents real-time detection of phishing and malicious websites, a phishing-risk calculator, claims of protection against spear-phishing and whaling, and channels for business enquiries and social engagement.

Scam/Impersonation Risk

The site presents a coherent security-software proposition and the captured homepage contains no login, payment, credential-collection, or investment flow. However, this benign page presentation is outweighed by a confirmed external threat contradiction: the domain is blacklisted, was classified as malicious by Google Safe Browsing, and received multiple malicious detections across external reputation assessments, including detections associated with Fortinet, Google, and Sophos. No conflicting legal identities or explicit brand-impersonation indicators were observed, but the external detections create a material risk for sensitive interaction and prevent the site from being treated as trustworthy. Evidence:

- The homepage markets cyber MATI as an AI-powered anti-phishing product and includes a phishing-risk calculator rather than a credential or payment form.
- External reputation assessments recorded 16 malicious detections and 1 suspicious detection; Google Safe Browsing also classified the domain as malicious.
- The domain was registered on 2024-12-26 and is approximately 1.65 years old; archive records contain 51 snapshots spanning 2024–2026, with 3 years tracked.

Regulatory Verification Notes

The available page content identifies the product brand but does not provide a corporate legal name, licensing claim, registration number, or clearly stated regulatory basis. That is a disclosure gap requiring independent confirmation, although the service described is enterprise security software rather than an obviously regulated financial product. The site's real-world operator is only likely connected to the presented brand, not independently verified. A single abuse report associated with an IP address was explicitly attributed to shared provider infrastructure and carries zero confidence, so it is a weak contextual signal rather than site-specific attribution. Evidence:

- The homepage identifies “MATI” and “cyber MATI” as the product and describes enterprise security capabilities without naming a legal operating entity.
- No licence authority or licence number is stated in the supplied site content.
- The site is hosted on AS8560, IONOS-AS - IONOS SE, DE.
- The transport certificate is a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid until 2026-12-29.

What to Verify Next

Before any commercial engagement, an independent registry or corporate-records check should confirm the operator behind the cyber MATI brand and its authority to provide the advertised services. Procurement should also obtain formal service terms, privacy and data-processing documentation, security assurances, and a verifiable business address through an independently sourced channel. Any future portal, download, authentication, or payment workflow should undergo a separate security review rather than being trusted solely because the public landing page is non-interactive. Evidence:

- The supplied material is a marketing landing page and does not establish the operator's legal identity or regulatory status.
- The captured page contains no sign-in or payment flow, so future interaction surfaces would represent a separate assessment scope.
- The homepage provides social and contact routes that should be authenticated through an independent, offline business channel before use.

Summary Verdict

The overall posture is **critical risk**, driven by confirmed external threat contradictions that override the site's otherwise coherent product presentation and normal technical operation. The brand connection appears plausible but remains unverified, and the available evidence does not support sensitive interaction.

Infrastructure Integrity

A CDN/WAF protection layer is present, and observed addressing was limited to edge infrastructure rather than an independently visible origin. This reduces direct exposure of the underlying service and is a mitigating

technical control, but it does not establish legitimacy or offset the external reputation findings.

Closing Assessment

The appropriate institutional posture is to suspend credential, data, download, and payment interactions pending independent operator validation and a fresh security review of any proposed engagement workflow.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 2001:8d8:100f:f000::200 (1&1 IONOS SE, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of cybermati.co.uk.

- The request stayed on cybermati.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under Ionos SE. CLEAR
- DNS for this domain is served by biz., across 4 name servers. NOTED
- The registration is paid up to 2026-12-26. NOTED

- The earliest public archive of this site is from 2024-12-26. CLEAR
- It is hosted on IONOS-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cybermati.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
