Full analysis

Overview

Cyclestore is an established UK online cycling retailer presenting bicycles, components, clothing, accessories, protection equipment, and outdoor gear for ordinary ecommerce purchases, supported by customer service, policies, finance options, and price-matching services.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or confirmed blacklist findings were observed. The homepage presents a coherent retail operation with detailed product navigation, customer-service information, policies, and ordinary ecommerce functionality; its published review claim and established operating history further support a legitimate identity. Normal account login and standard purchasing are appropriate.

- Homepage analysis identified no brand-impersonation indicators, hidden forms, or sensitive credential form.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist finding.
- The domain was registered in 1999 and is approximately 27.55 years old.
- Archive records contain 1,644 snapshots spanning 1999–2026, covering 28 tracked years.

Regulatory Verification Notes

The site presents company, regulatory, policy, contact, and finance-related information consistent with an established retailer. No specific financial-services license or registration number is claimed or verified in the supplied evidence; this is a limited transparency point relevant to any finance-broker referral activity, not evidence of deception. No adverse broker-reputation match was identified.

- Homepage content identifies Cyclestore as a Congleton, Cheshire retailer and provides company, regulatory, and policy information.
- The homepage presents finance options and related referral activity alongside retail services.
- The domain registrar is 20i Ltd; registration runs from 1999-01-19 to 2031-01-19.

What to Verify Next

For any finance-related service, confirm the relevant provider and authorization directly through the applicable official registry before relying on that arrangement. Standard retail purchases and account use may proceed normally.

- The homepage provides finance information that can be matched against the named financing provider's official terms.
- The site exposes customer-service and policy information suitable for independent confirmation.
- The site operates as an established ecommerce storefront rather than presenting investment, cryptocurrency, or payment-collection features.

Summary Verdict

The website presents a high-trust posture supported by convergent identity, content, historical, reputation, behavioral, and security evidence. It is a legitimate, established online retailer with no observed contradiction requiring heightened interaction restrictions.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which mitigates direct origin exposure and provides a positive defensive control, although protective hosting alone is not proof of legitimacy. The observed edge infrastructure is consistent and resolved through a recognized network.

Closing Assessment

Normal browsing, account login, and standard transactions are appropriate, with routine attention to the terms of any separately provided finance service.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about cyclestore.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
