The page as captured

<https://dadhichisolarpower.com/>

What dadhichisolarpower.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Dadhichi Solar Power is a corporate services website presenting Dadhichi Solar Power LLP as a Maharashtra-based solar engineering, procurement, and construction provider for residential, cooperative-society, commercial, and industrial projects, with installation, after-sales support, partnerships, and quotation services.

Scam/Impersonation Risk

The site's stated business model is a conventional solar EPC operation, and its homepage presents service descriptions, regional locations, contact details, and a claimed association with the SkinCity Group. The page-level review found no login form, wallet connection, sensitive submission form, or explicit brand-impersonation indicators. However, these benign content characteristics are materially outweighed by confirmed external threat detections and blacklist status associated with the domain. The available evidence therefore supports a **critical sensitive-interaction risk** assessment despite the site's professional presentation; no separate conflicting legal-entity names were observed across the supplied identity evidence.

EVIDENCE

- The homepage describes residential, commercial, and industrial solar solutions, installation, and after-sales support.
- External reputation checks recorded 15 malicious detections, including detections attributed to Fortinet and Sophos, and a confirmed blacklist condition.
- Domain registration telemetry: created 2024-01-17 and recorded as 2.59 years old.
- Archive telemetry records 9 snapshots spanning 2024–2025, with first seen 2024-01-18 and last seen 2025-07-11.

Regulatory Verification Notes

The website identifies itself as Dadhichi Solar Power LLP and presents a corporate solar-services profile, but the supplied evidence does not show a claimed license, licensing authority, or registration number. This is a regulatory and disclosure verification gap rather than, by itself, proof of fraud. The site's apparent business model is not supported by an independent regulatory determination in the available evidence, while the confirmed external blacklist and malicious detections remain the principal legitimacy concern. The domain's transport security is valid, but domain validation confirms encrypted transport rather than the identity or authorization of the operator.

EVIDENCE

- The homepage and “About Us” content identify Dadhichi Solar Power LLP and describe the claimed SkinCity Group relationship.
- Hosting telemetry: served through AS26496, AS-26496-GO-DADDY-COM-LLC, GoDaddy.com, LLC.
- TLS telemetry: certificate issued by YR2 at DV validation level, valid to 2026-11-17T09:32:50+00:00.
- The supplied business-model record contains no license claim, licensing authority, or license number.

What to Verify Next

Before any contract, deposit, site visit, document exchange, or other consequential engagement, the claimed LLP identity should be checked against the applicable Indian corporate registry and any relevant state or energy-sector authorization records. The stated relationship with SkinCity Group should be confirmed through an independently sourced corporate channel rather than relying solely on the website. Payment arrangements should use documented, reversible commercial methods, with quotation, warranty, installation, and after-sales obligations confirmed in writing. Official contact channels and physical operating details should also be validated through an independent offline route.

EVIDENCE

- The homepage provides the claimed company name, Maharashtra locations, telephone contact, and quotation pathway.
- The “About Us” content attributes the business to the SkinCity Group and describes a legacy in healthcare and real estate.
- The service and partnership sections describe project delivery and after-sales support but do not supply an independently verified authorization record.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The domain's credible corporate presentation does not overcome the converging external threat and blacklist evidence, and the real-world operator identity remains unverified. Account, credential, financial, and other consequential interactions should be treated as unsafe on the present evidence.

Infrastructure Integrity

The site is fronted by a CDN/WAF layer, which limits direct exposure of the origin and provides a mitigating defensive control, but this infrastructure characteristic does not establish legitimacy or neutralize the external reputation findings. The observed address was an edge address, and no origin candidate was identified in the supplied infrastructure analysis.

Closing Assessment

A prospective customer or enterprise counterparty should suspend sensitive engagement until the operator, authorization status, and payment arrangements have been independently validated through trusted external channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dadhichisolarpower.com.

- The request stayed on dadhichisolarpower.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-17. NOTED
- The earliest public archive of this site is from 2024-01-18. CLEAR
- It is hosted on AS-26496-GO-DADDY-COM-LLC, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dadhichisolarpower.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
