What dailyrevelationzambia.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is Daily Revelation, a Zambian local-news publisher presenting headlines, politics, business, court, international coverage, editorials, an e-paper, and contact information. Its apparent business model is advertising, classified placements, sponsored content, and possible newsletter or subscription activity rather than financial services.

Scam/Impersonation Risk

The site's content presents as a conventional news publication, and page-level review found no credential-harvesting forms, payment interfaces, wallet-connect functions, or explicit impersonation indicators. However, the domain is associated with confirmed blacklist detections from two external sources, including five malicious and one suspicious detection, which is a material contradiction to the otherwise ordinary editorial presentation. Abuse reports concerning the hosting IP are attributed to shared provider infrastructure rather than directly to the site, but they remain a relevant environmental risk signal. The site should therefore be treated as unsuitable for sensitive interaction unless the external detections are independently resolved.

EVIDENCE

- The homepage identifies “Daily Revelation News” and displays local, political, business, international, and editorial content.
- External reputation checks recorded 5 malicious and 1 suspicious detection for the evaluated domain, with confirmed blacklist status.
- Hosting-IP reputation records contain 65 abuse reports attributed to shared infrastructure operated by WHG Hosting Services Ltd; the attribution is to the provider IP rather than conclusively to the website operator.

Regulatory Verification Notes

The available pages describe a news and media operation but do not independently establish the real-world legal entity behind it. No licensing or registration number is claimed in the supplied site content; for a publisher, this is a transparency and verification matter rather than proof of fraud. The identity remains unverified, and the blacklist findings materially reduce confidence in relying on the site’s self-presentation. The absence of a broker-dataset match provides no licensing or regulatory conclusion.

EVIDENCE

- Domain registration records show BlueHost Inc. as registrar; the domain was created on 2019-08-23 and expires on 2026-08-23.
- The domain registration is approximately 7 years old.
- The site’s transport encryption uses a DV certificate issued by YR1, valid through 2026-10-02.

What to Verify Next

An organization considering engagement should confirm the publisher’s legal entity, editorial ownership, and operating contact channels through an independent offline or established third-party route. Any claimed registration or publishing authorization should be checked directly against the relevant Zambian registry or authority. Before sensitive use, the external blacklist detections should be reviewed for scope, current status, and remediation, and ordinary browsing should be separated from account, credential, or payment activity until those checks are complete.

EVIDENCE

- The homepage provides a publisher name, navigation to editorial sections, and a contact route, but the supplied content does not independently verify the operator.
- The site analysis found no sensitive forms and no untrusted form destination on the captured pages.
- The available business-model classification is news/media with advertising and contact-based revenue channels.

Summary Verdict

The website has a conventional news-publishing appearance but carries a **critical trust posture** because confirmed external threat detections and blacklist status outweigh its benign page presentation. Its real-world operator identity is not independently verified, and the available evidence does not support sensitive interaction.

Infrastructure Integrity

The site resolves to a single likely origin address rather than a detected CDN edge, hosted by WHG-DAL — WHG Hosting Services Ltd in Great Britain on AS36454. A valid DV TLS certificate provides transport confidentiality, but this protective control does not establish legitimacy or offset the adverse reputation findings.

Closing Assessment

Restrict use to passive, read-only viewing unless independent identity and reputation checks produce a clear resolution; account login, credential submission, and financial activity should not proceed on the basis of the current evidence.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 65 reports on hosting IP 192.250.227.238 (WHG Hosting Services Ltd, Content Delivery Network), 36% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dailyrevelationzambia.com.

- The request stayed on dailyrevelationzambia.com. It was not redirected to another domain. [CLEAR](#)

- Registration is published under Bluehost Inc.. CLEAR
- DNS for this domain is served by mysecurecloudhost.com, across 4 name servers. NOTED
- The registration is paid up to 2026-08-23. NOTED
- The earliest public archive of this site is from 2021-09-18. CLEAR
- It is hosted on WHG-DAL, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dailyrevelationzambia.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
