

Is dailytimes.com.pk legit? TrustSniffer's high-trust assessment: 100/100

dailytimes.com.pk

Verdict

100

OUT OF 100

HIGH TRUST

dailytimes.com.pk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Homepage of Daily Times — an established Pakistani news website featuring national and international news, business, sports, lifestyle, opinion pieces, and an e-paper. The site uses a consent management platform and multiple advertising vendors.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Daily Times is an online news and media publication presenting current affairs and editorial content to visitors, with an apparent advertising-supported publishing model focused on Pakistani, international, business, sports, lifestyle, and opinion coverage.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent editorial news service rather than an investment, payment, or credential-harvesting operation, and no brand-impersonation, phishing, or malicious-content indicators were identified. Behavioral review detected repeated hidden forms, but no login form, password-external form, wallet activity, clipboard manipulation, or suspicious inline scripts; in context, this is not sufficient to establish deceptive behavior. The domain's long registration continuity, substantial historical publishing record, clean external reputation, and established page authority collectively support an apparently legitimate site, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- Domain registration records show registration on 2001-10-30 and an age of 24.8 years.
- Web-archive records show 5,000 snapshots spanning 2002-05-24 to 2016-10-02, covering 15 years.
- The homepage has no login form or sensitive form, and behavioral review recorded zero wallet-connect, wallet-sensitive, wallet-drainer, or clipboard-hijack runs.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or impersonation indicator identified.

Regulatory Verification Notes

Daily Times presents itself as a news publisher, not as a financial or other regulated-services provider. The supplied site content does not show an independently verified legal-entity identity, and no regulatory license or registration number is claimed; this is a transparency and verification point rather than evidence of a scam. Its advertising and consent-management model is consistent with a content publisher, while the available evidence does not establish a regulated third-party affiliation.

EVIDENCE

- The homepage identifies “Daily Times” and provides national, international, business, sports, lifestyle, editorial, and e-paper content.
- The site describes an advertising-supported model using display and targeted advertising, third-party ad networks, vendor partnerships, and consent management.
- Hosted on AS13335 (Cloudflare), with Cloudflare, Inc. identified as the hosting organization.
- TLS certificate issued by WE1 (DV), valid to 2026-10-21.

What to Verify Next

Before credential or payment interactions, an independent source should be used to confirm the publication’s operating entity and the authenticity of its official contact channels. Any applicable privacy, advertising, editorial-correction, or payment-related terms should be reviewed on the site before relying on them; the homepage’s e-paper and regional editions should be matched against independently sourced publication information where institutional assurance is required.

EVIDENCE

- The homepage provides an e-paper offering and editions associated with Lahore, Islamabad, and Karachi.
- The site links to established social platforms including Facebook, Twitter, Instagram, and YouTube.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradicting signal was observed, but the operator’s real-world identity is not independently proven by the supplied evidence.

Infrastructure Integrity

The site is protected by Cloudflare CDN and WAF infrastructure. All observed addresses were CDN edge servers, and no origin-server candidate was identified in this analysis; this reduces direct origin exposure and is a mitigating infrastructure characteristic, not proof of legitimacy.

Closing Assessment

Normal browsing and ordinary editorial use are proportionate to the observed posture; independent operator-identity, policy, and payment-protection checks should be completed before any credential or payment interaction.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

LIKELY

Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dailytimes.com.pk.

- The request stayed on dailytimes.com.pk. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2031-10-30. [CLEAR](#)
- The earliest public archive of this site is from 2002-05-24. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dailytimes.com.pk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
