Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Daily Trust is an established Nigerian news and media publisher presenting breaking news, investigative reporting, politics, business, sports, podcasts, videos, opinion, and regional coverage, with advertising, sponsored content, business listings, and newsletter engagement supporting its publishing model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent news-publishing identity, broad editorial coverage, related media properties, social channels, and ordinary newsletter functionality; it does not request deposits, promote financial returns, or display phishing, impersonation, or malicious-content indicators. Normal interaction, including account login where offered and standard site use, is appropriate.

- The homepage identifies the service as Daily Trust and provides news, business, politics, sports, podcast, video, and opinion sections.
- The homepage contains one newsletter-signup form, with no login form, hidden sensitive form, wallet-connect behavior, or external password form observed.
- Independent reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or impersonation finding.

Regulatory Verification Notes

Daily Trust operates as a media publisher rather than a financial-services platform, so the reviewed content does not present a financial license or investment-registration claim requiring validation. Its contact information, advertising and sponsored-content pathways, and links to related Media Trust properties provide ordinary publisher transparency. For formal procurement or contracting, the relevant legal entity and commercial terms should still be confirmed through the publisher's stated corporate channels.

- The homepage presents advertising, sponsored-content, business-listing, and newsletter monetization rather than deposit-taking or promised-return services.
- The domain was registered in 2004 and is approximately 22.11 years old; the registrar is GO54 Limited.
- The site is served from AS13335, Cloudflare, Inc.; its TLS certificate is issued by WE1 at DV validation level and is valid to 2026-09-14 07:49:03 UTC.

What to Verify Next

For institutional engagement, confirm the contracting entity, advertising terms, and official contact routes through independently sourced corporate records or an established offline channel. Routine browsing, newsletter signup, and normal site interaction are proportionate to the observed posture.

- The homepage provides contact information and links to related media properties.
- The homepage exposes standard publisher sections and a newsletter form without sensitive transaction fields.
- The domain’s long registration history and current transport certificate provide concrete continuity and security checks for institutional onboarding.

Summary Verdict

The website presents as a legitimate, established, and trustworthy media service with a coherent identity and no observed scam or impersonation indicators. Its overall posture supports normal use and routine engagement.

Infrastructure Integrity

Cloudflare CDN and WAF protection place observed traffic behind Cloudflare edge infrastructure, with all six observed addresses associated with AS13335 and no origin candidate identified. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not independently determinative of legitimacy.

Closing Assessment

Standard browsing and ordinary account or subscription interaction are appropriate; higher-value institutional arrangements should follow the organization’s normal contracting and contact-verification controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dailytrust.com.

- The request stayed on dailytrust.com. It was not redirected to another domain. CLEAR
- Registration is published under GO54 Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-26. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dailytrust.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
