

Is damianwampler.com safe? TrustSniffer's low-trust assessment: 40/100

damianwampler.com

Verdict

40

OUT OF 100

LOW TRUST

damianwampler.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A simple coming-soon / parked WordPress page for 'Damian Wampler' served via Bluehost. Contains hosting promo links and a standard WordPress login prompt. No calls for payment or sensitive data collection are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What damianwampler.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a parked, coming-soon personal WordPress site presented under the name “Damian Wampler.” Its homepage contains a brief coming-soon notice, Bluehost hosting-promotion links, and a standard WordPress login prompt, but it does not present a developed service, clear commercial purpose, or transaction flow.

Scam/Impersonation Risk

The site itself does not display payment requests, sensitive-data forms, phishing content, or apparent brand impersonation, and no conflicting legal identities were observed. However, the domain is confirmed **blacklisted**, with multiple external malicious detections, including three malicious and one suspicious assessment. That contradiction materially outweighs the benign appearance of the parked page for purposes of login, credential submission, or financial activity. The result is a security-forward posture in which passive viewing is materially less concerning than any sensitive interaction.

EVIDENCE

- The homepage is a 211-character “Damian Wampler — Coming Soon” WordPress landing page with no payment request or sensitive-data form.
- External reputation data records 3 malicious detections, 1 suspicious detection, and a confirmed blacklist status.
- The domain was registered on 2008-11-14 (~17.77 years old); archive records indicate first seen 2011-02-01, last seen 2025-11-25, and 15 years tracked.

Regulatory Verification Notes

The available material does not independently verify the real-world operator behind the personal name displayed on the site. Ownership and governance disclosures are opaque, while the supplied page content contains no substantive legal, corporate, licensing, or regulated-service disclosure. If the site is later used to offer financial or other regulated services, the absence of an identifiable regulatory basis would require direct verification; it is not, by itself, proof of fraud. No broker match was identified in the available third-party contextual data.

EVIDENCE

- The homepage identifies “Damian Wampler” but provides no substantive about, legal, terms, or licensing information.
- The domain is registered through Bluehost Inc.; registration date: 2008-11-14; expiration date: 2026-11-14.
- Hosting is on AS31898 (ORACLE-BMC-31898 — Oracle Corporation, US).
- The site uses a DV TLS certificate issued by YR2, valid to 2026-11-03.

What to Verify Next

Before any sensitive interaction, an independent source should establish who controls the domain and confirm that the displayed personal identity is connected to that operator. If the site begins offering financial, investment, brokerage, or other regulated services, the claimed entity and applicable authorization should be checked directly against the relevant official registry. Official contact channels should also be confirmed through an independent route rather than relying solely on the website.

EVIDENCE

- The current page is categorized as a parked or coming-soon personal site and presents no clear monetization or transaction mechanism.
- Behavioral testing recorded no wallet-connection activity, wallet-sensitive activity, hidden forms, or external password forms.
- The page includes a WordPress login prompt, making authentication handling the principal sensitive interaction currently exposed.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site has a long registration history and a technically valid transport layer, but those administrative and technical positives do not overcome the confirmed external reputation contradiction or the lack of independently verified operator identity.

Infrastructure Integrity

The site is resolved to Oracle Corporation infrastructure in the United States on AS31898, with one identified IP and no CDN or edge-IP layer detected. This supplies basic infrastructure attribution but does not establish legitimacy or offset the reputation-based risk.

Closing Assessment

Passive viewing may be limited to informational purposes, while login, credential submission, and financial activity should be withheld until the operator and any applicable authorization have been independently confirmed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of damianwampler.com.

- The request stayed on damianwampler.com. It was not redirected to another domain. CLEAR
- Registration is published under Bluehost Inc.. CLEAR
- DNS for this domain is served by bluehost.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-14. NOTED
- The earliest public archive of this site is from 2011-02-01. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about damianwampler.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
