

Is danglesnipe.com a scam? TrustSniffer's high-risk assessment: 0/100

danglesnipe.com

Verdict

0

OUT OF 100

CRITICAL RISK

danglesnipe.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple Apache-style directory index page listing 'cgi-bin/' and timestamps. No forms, no monetization, no branding.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	12 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	12 years old Registered history	CLEAR
Web archive	Archived since 2018 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

What danglesnipe.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

A generic Apache-style server directory listing, the site presents only an “Index of /” page with a single `cgi-bin/` directory and no visible branding, service description, commercial offer, credential form, or stated business purpose.

Scam/Impersonation Risk

The site carries a **critical sensitive-interaction risk** because external threat intelligence recorded 12 malicious detections and a confirmed blacklist presence across two sources. This finding outweighs the homepage’s low inherent risk profile: the captured page is merely a directory index and does not itself display phishing forms, request credentials, solicit funds, or demonstrate brand impersonation. The available evidence therefore supports a confirmed external threat-reputation concern, while not establishing a specific impersonated brand or an active phishing workflow on the captured page.

EVIDENCE

- External scanning recorded 12 malicious detections and identified the domain as blacklisted by two external sources.
- The domain was registered on 2014-03-07 and is approximately 12.46 years old; its age does not offset the current threat detections.
- Historical records contain 8 archive snapshots spanning 2018–2025, with 8 years tracked; the available history does not establish a benign operating purpose.

Regulatory Verification Notes

Identity remains unverified, and the captured site provides no identifiable business operator, licensing claim, registration number, or regulated-service disclosure. The homepage's directory-only presentation supplies no basis for connecting the domain to a regulated financial, brokerage, or other commercial entity. A long-established registration through GoDaddy.com, LLC and valid transport encryption are positive technical facts, but they do not prove operator identity, authorization, or suitability for sensitive use.

EVIDENCE

- The homepage contains no company name, legal notice, licensing disclosure, or regulated-business description.
- Domain registration lists GoDaddy.com, LLC as registrar, with creation on 2014-03-07 and expiration on 2027-03-07.
- Hosting resolves to AS10843 operated by AITNET - Advanced Internet Technologies, US.
- The site uses a DV TLS certificate issued by YR1, valid through 2026-11-11.

What to Verify Next

Before any interaction beyond passive observation, an independent official channel should confirm that this domain is an intended endpoint rather than an exposed or misdirected server. The domain should not be used for authentication, credential submission, downloads, financial activity, or other sensitive operations unless that independent confirmation is obtained; if a regulated service is later claimed, its operator and authorization should be checked directly with the relevant official registry.

EVIDENCE

- The captured homepage exposes a directory index rather than a documented service or identity-controlled application.
- No forms were present on the homepage, including no login or sensitive-input form.
- Technical behavior recorded 0 external XHR requests, 0 external POST requests, 0 wallet-connection runs, and 0 clipboard-write events across 2 successful runs.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The site's minimal informational presentation does not resolve the confirmed external threat-reputation contradiction or the unverified operator identity. Passive observation is the only defensible use supported by the available evidence.

Infrastructure Integrity

The site is directly hosted through AITNET - Advanced Internet Technologies, US, on AS10843, with one resolved IP and no detected CDN edge layer. This provides a technically identifiable hosting path, but the absence of a CDN or WAF-based intermediary means infrastructure visibility does not mitigate the external reputation concern.

Closing Assessment

Prospective users should refrain from sensitive interaction and first validate the domain through an independent, trusted channel; any suspected exposure should be reported to the relevant hosting or security-response provider.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of danglesnipe.com.

- The request stayed on danglesnipe.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by danglesnipe.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-07. NOTED
- The earliest public archive of this site is from 2018-08-07. CLEAR
- It is hosted on AITNET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about danglesnipe.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
