

Is daobit.ru legit? TrustSniffer's high-trust assessment: 100/100

daobit.ru

Verdict

100

OUT OF 100

HIGH TRUST

daobit.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Russian corporate homepage for ООО «Даобит», a developer of specialized railway-logistics software covering tariff calculations, transport information, route construction, wagon operations, updates, and support. The page identifies the company and its Saint Petersburg address, provides several telephone numbers and a corporate email address, and includes a consultation form with consent and privacy-policy notices.

- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Daobit.ru is a Russian corporate website for ООО «Даобит», a B2B developer of specialized railway logistics software. The site presents product modules for rail-tariff calculation, routing, transport information, and wagon-operations management, along with update and support pages. It lists a Saint Petersburg business address, multiple telephone contacts, and a corporate email, and offers a consultation request form with clear consent and privacy-policy notices—consistent with a software vendor seeking enterprise customers.

Scam/Impersonation Risk

No contradictions, impersonation, phishing, or blacklist hits are observed. The on-site identity is consistent across pages, and the product descriptions, contact details, and privacy notices align with a legitimate B2B software provider footprint. External reputation checks show no malicious flags, and the site's historical web presence is continuous with no sign of repurposing. Evidence:

- Domain provenance: Registered 2021-11-01 (~4.75 years old).
- Web-archive continuity: 392 archive snapshots spanning 2021–2026 (6 years tracked).
- External reputation: No malicious detections across major checks; Tranco rank 266,346 (top 1M).
- On-site presentation (homepage): Named company, address in Saint Petersburg, phones, email, and consultation form with consent/privacy references.

Regulatory Verification Notes

As a corporate software vendor rather than a regulated financial service, the site appropriately focuses on product information, implementation, and support. The company name is explicitly stated, and contact channels and a physical address are provided on the site. Transport encryption is correctly implemented with a current certificate from a mainstream issuer. No licensing claims are made or expected for the software products described. Evidence:

- Identity disclosure (homepage/about/contacts): ООО «Даобит» named, address and telephone contacts listed.
- Hosting/ASN: Served from AS51700 (CTM_Ltd-AS - CTM Ltd, RU).
- TLS: Certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025 (DV), valid to 2027-03-23.
- Registrar/expiry: REGRU-RU; domain expires 2026-11-01.

What to Verify Next

Evidence:

- If initiating a commercial engagement, confirm the legal entity details (ООО «Даобит») and registered address against Russia’s corporate registry.
- For procurement, request a formal proposal or contract on company letterhead that matches the on-site identity and contact details.
- Validate phone numbers through a short out-of-band check (e.g., callback during business hours) before sharing sensitive business information.
- Corporate presentation (homepage): Company name, address, multiple phone contacts.
- Consultation workflow (contact/form): Lead-intake form with consent and privacy notices supporting standard B2B outreach.
- Stable historical presence: Archive continuity from 2021 through 2026.

Summary Verdict

This is a legitimate, established corporate website for a Russian B2B railway logistics software provider. The consistent on-site identity, long-running and continuous web history, clean external reputation, and standard transport security support normal interaction and standard account or inquiry actions.

Infrastructure Integrity

The site resolves directly to hosting in Russia with CTM Ltd and no third-party CDN layer indicated. The origin is stable and reachable, and transport is protected by a valid DV certificate from a well-known certificate authority, which is appropriate for a corporate software website.

Closing Assessment

Normal use is appropriate. Prospective customers can submit consultation requests and engage through the published channels; standard enterprise due diligence (e.g., confirming corporate registration and executing contracts through official contacts) is recommended for commercial onboarding.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of daobit.ru.

- The request stayed on daobit.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by 57.7, across 2 name servers. NOTED
- The registration is paid up to 2026-11-01. NOTED
- The earliest public archive of this site is from 2021-12-01. CLEAR
- It is hosted on CTM_Ltd-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about daobit.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
