Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the corporate product portal for DaouOffice, an established subscription-based enterprise SaaS platform that combines groupware, office administration, human-resources management, accounting, and enterprise-system integrations, with tiered plans, optional services, implementation support, and free trials.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or confirmed malicious reputation signals were observed. The long-established domain, meaningful global traffic presence, clean threat-reputation results, and consistent corporate presentation support the conclusion that this is the legitimate DaouOffice service rather than a deceptive copy. Normal account access and standard interaction are appropriate.

- The domain-registration record shows registration through Gabia, Inc. on 18 November 2013: Registered 2013 (~12.7 years old), with expiry on 18 November 2026.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no reported abuse, and no signature matches for the assessed domain.
- Traffic telemetry places the domain at rank 150,541, within the global top one million websites.
- The homepage showed no brand-impersonation indicators, hidden forms, credential forms directed externally, cloaking, clipboard manipulation, cryptocurrency-wallet activity, or suspicious inline scripts.

Regulatory Verification Notes

The homepage presents DaouOffice as a commercial enterprise-software service backed by Daou Technology and includes corporate identifiers, a business-registration number, physical address, telephone numbers, and business contact channels. It also references security policies and ISMS-related material. The supplied evidence does not establish a specific licence claim or independently confirm the scope of the referenced certifications; however, the service is presented as general enterprise software rather than a financial, brokerage, or investment product for which a sector-specific operating licence would ordinarily be central. This is a procurement-verification matter, not an indication of impersonation or fraud.

- The homepage identifies Daou Technology as the organization supporting the platform and publishes corporate registration and contact information.
- The homepage navigation provides dedicated company, security-policy, pricing, customer-support, and enterprise-service material.
- The site's hosting infrastructure is served from AS396982 (Google Cloud Platform — Google LLC, US).

- The site's transport encryption uses a WR3-issued domain-validated certificate (DV), valid to 19 October 2026.

What to Verify Next

Before enterprise deployment, procurement teams should confirm the contracting entity against the issued quotation, obtain the applicable service agreement and data-processing terms, establish where organizational data will be stored and processed, and review the precise scope and currency of claimed security certifications. Technical teams should also document the permissions and data flows required by any ERP, HR, access-control, Works, or API integration and confirm official commercial and support channels through the organization's published corporate details.

- The enterprise-service material advertises integration with ERP, HR, access-control, and Works systems, creating a need for interface-specific access and data-flow review.
- The security-policy material states that five security measures protect corporate data, making the underlying controls and certification scope appropriate subjects for procurement diligence.
- The pricing material includes service and enterprise tiers, installation charges, optional paid services, promotional discounts, and trial arrangements that should be reconciled with the final contract.
- The homepage provides introduction documents, implementation enquiries, customer support, customer cases, and API information that can support direct commercial and technical validation.

Summary Verdict

DaouOffice presents as a legitimate, established, and trustworthy corporate SaaS website. Its identity, operating model, technical posture, public footprint, and external reputation converge without contradictory risk signals, supporting high confidence in normal website use.

Infrastructure Integrity

The service is hosted on mainstream Google Cloud infrastructure at the observed public address, with valid encrypted transport. This provides a professionally managed hosting foundation and reduces common infrastructure-integrity concerns, although hosting quality alone is not evidence of business legitimacy.

Closing Assessment

Prospective users may interact with the site normally, including signing in and using standard account functions; enterprise adoption should proceed through ordinary contractual, privacy, security, and integration due diligence.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of daouoffice.com.

- The request stayed on daouoffice.com. It was not redirected to another domain. CLEAR
- Registration is published under Gabia, Inc.. CLEAR
- DNS for this domain is served by co.kr, across 2 name servers. NOTED
- The registration is paid up to 2026-11-18. NOTED
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about daouoffice.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
