

Is darmatech.ro safe? TrustSniffer's low-trust assessment: 40/100

darmatech.ro

Verdict

40

OUT OF 100

LOW TRUST

darmatech.ro is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Local construction company site (DarmaTech) with service descriptions, project portfolio, contact phone numbers, email and physical address in Bucharest. No payment or login flows detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What darmatech.ro served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

DarmaTech is a Romanian construction-company website presenting general contracting services, sector-specific construction solutions, a portfolio of completed projects, and contact details, with an apparent business model based on client contracts for residential, industrial, commercial, and specialized building work.

Scam/Impersonation Risk

No conflicting legal identities, page-level impersonation indicators, phishing forms, login mechanisms, payment flows, or wallet-related behavior were observed. However, the domain is recorded on an external blacklist, and the evaluated external reputation signals include one malicious and one suspicious detection. That finding is a material contradiction to the otherwise conventional construction-company presentation and supports a clearly cautionary posture for sensitive interactions. The site's apparent business model does not, by itself, resolve the external reputation concern.

EVIDENCE

- The homepage presents DarmaTech as a construction business and lists residential, HoReCa, office, retail, production-hall, platform, water-reservoir, and refurbishment services.
- The contact and corporate pages provide telephone numbers, an email address, and a Bucharest physical address; no login or payment form was detected.
- External reputation evaluation recorded 1 malicious detection and 1 suspicious detection, with the domain also marked on an external blacklist.
- The domain was registered on 2007-09-12 and is approximately 18.95 years old; historical coverage records 107 archive snapshots spanning 2008–2026, with 19 years tracked.

Regulatory Verification Notes

The website's About, Services, Portfolio, and Contact content is consistent with a local construction contractor, but the real-world operator remains independently unverified. The site does not present a license claim, license number, or clearly identifiable legal-entity disclosure in the supplied content, leaving construction authorization, corporate standing, and contractual accountability unresolved. Ownership opacity is therefore a governance and transparency concern rather than proof of fraudulent identity. The absence of a matching third-party broker record is only contextual and does not establish regulatory standing.

EVIDENCE

- The About page claims more than 15 years of activity and hundreds of completed projects, while the Portfolio page names projects including Neora Estate Baneasa, Hala SGS Romania, and Clinica Oana Nicolau.
- The supplied registration record identifies HOST GATE SRL as registrar.
- The site's hosting infrastructure resolves to AS3223 (VOXILITY - Voxility LLP, GB), with the server located in Romania.
- The site's TLS certificate is issued by YR2, uses DV validation, and is valid until 2026-10-15T17:18:25+00:00.

What to Verify Next

Before any contract, advance payment, document exchange, or other consequential engagement, the purported operator should be corroborated through independent Romanian corporate and construction-authorization records. The legal contracting entity, signatory authority, project references, insurance coverage, and payment beneficiary should match independently obtained records rather than relying solely on the website. Contact details should also be confirmed through an independently sourced route, and any proposed payment should use documented contractual protections.

EVIDENCE

- The About page's activity-history and project-volume claims should be matched to independently verifiable company records and references.
- The Services and Portfolio pages provide the stated business scope and named projects that can be used for reference validation.
- The Contact page supplies the channels and physical location requiring independent confirmation before consequential engagement.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site's content is coherent with an ordinary construction-business website, but the confirmed external blacklist contradiction and the absence of independently verified operator identity prevent a legitimate or trusted classification.

Infrastructure Integrity

The site is served directly from a likely origin rather than through a detected CDN or WAF, using VOXILITY infrastructure in Romania under AS3223. This provides a technically resolved hosting arrangement but no meaningful edge-layer mitigation, so infrastructure characteristics should be treated as neutral technical context rather than evidence of legitimacy.

Closing Assessment

Informational browsing may be limited to non-sensitive review, while credentials, financial details, advance payments, and confidential project documents should not be submitted until the operator and proposed transaction have been independently validated.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of darmatech.ro.

- The request stayed on darmatech.ro. It was not redirected to another domain. CLEAR
- Registration is published under HOST GATE SRL. CLEAR
- DNS for this domain is served by hostgate.ro, across 2 name servers. NOTED
- The earliest public archive of this site is from 2008-01-24. CLEAR
- It is hosted on VOXILITY, from a server in RO. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about darmatech.ro at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
