## Full analysis

### Overview

The website is a Ukrainian agricultural-machinery dealer and ecommerce catalogue operating under the Deutsche Agrartechnik/DAT name. It presents equipment categories covering crop protection, fertilisation, soil preparation, seeding, harvesting, irrigation, livestock operations and related machinery, with an apparent business model based on equipment sales, financing, spare parts, installation and servicing.

### Scam/Impersonation Risk

No contradictions were observed across the available evidence: there were no detected phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent commercial catalogue with company-history material, product categories, telephone contact and working hours rather than improbable investment returns, cryptocurrency functionality, or other common abuse patterns. The site's account login and registration functions appear to be ordinary ecommerce features, and observed browser behaviour did not identify hidden forms, wallet activity, credential redirection, cloaking, or suspicious scripts.

#### EVIDENCE

- The homepage is classified as an agricultural-machinery ecommerce/catalogue page and contains substantive product and company content.
- The site's domain was registered on 2003-03-12 and is approximately 23.46 years old.
- Historical records show 129 archive snapshots spanning 2009–2025, covering 17 tracked years.
- External reputation results recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.

#### Regulatory Verification Notes

The legal and identity material provides a company history and commercial contact information, but the real-world operator remains independently unverified. No licensing claim or license number is presented; for an agricultural-equipment dealer, this is a transparency and verification point rather than evidence of a scam. The financing service should be understood as a commercial offering whose provider, contractual terms and applicable protections require independent confirmation. A separate broker-reputation dataset produced no match, which is contextual reassurance only and not a licensing or regulatory determination.

#### EVIDENCE

- The about and contact material describes the dealer's history and provides telephone contact and stated working hours.
- Registration records identify the registrar as TOB "Интернет Инвест".
- The site is served from AS24723, Atman Sp. z o.o. (ATMAN-OFFICE-INTERNET-AS - Atman Sp. z o.o., PL).
- Transport encryption uses a valid DV certificate issued by YE1, with validity through 2026-09-28.

#### What to Verify Next

Before credential or payment interactions, independently confirm the merchant's legal identity, the entity responsible for any financing arrangement, applicable sales and return terms, warranty coverage, and available payment protections. Contact details should be cross-checked through an independent business directory, manufacturer channel, or offline communication route rather than relying solely on the website. Account registration should be limited to information necessary for the intended transaction.

#### EVIDENCE

- The homepage exposes login and registration functions alongside the product catalogue.
- The site identifies financing, spare parts, installation and service as separate commercial functions requiring transaction-specific confirmation.
- The observed forms did not submit sensitive information to an untrusted external destination.

#### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated commercial purpose. No scam or impersonation contradiction was identified, although the operator's real-world identity is not independently verified.

## Infrastructure Integrity

The website resolves directly to a single observed address, 77.83.100.7, without a detected CDN or WAF layer. This means there is no identified edge-protection layer to provide additional mitigation, but the observed hosting arrangement does not contradict the overall trust assessment.

## Closing Assessment

Ordinary browsing and routine catalogue use are proportionate; before committing credentials, funds, or contractual information, conduct the standard independent merchant-identity, terms-and-conditions, and payment-protection checks.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about dat.kiev.ua at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
