Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Databias is a business software and managed-services website presenting centrally managed email signatures, branded banners, domain administration, support resources, and integrations for Microsoft 365, Google Workspace, and on-premise Exchange.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent SaaS business model with specific services, support functionality, customer-facing documentation, and an “About Us” claim of operation since 2010. The site does not promote deceptive financial products or other high-risk mechanisms.

- Homepage content describes centrally managed email branding, banners, and domain administration.
- Homepage navigation provides Company, Contact Us, Knowledge Base, Sign In, and Register functions.
- Domain registration records show creation on 2017-03-29, approximately 9.35 years ago, through NAMECHEAP INC.

Regulatory Verification Notes

Databias presents itself as a commercial software and managed-services provider rather than a regulated financial service. Its pages expose company, contact, support, and licensing-related navigation, while the supplied evidence does not identify a regulated license or registration number; this is a transparency item for ordinary procurement diligence, not evidence of deception. Registration privacy is an administrative detail and does not create an identity contradiction.

- The homepage identifies integrations with Office 365, Exchange, and G Suite/Google Workspace.
- The site provides an About Us page, knowledge base, support-request functionality, and contact navigation.
- TLS is issued by YR2 at DV validation level and is valid through 2026-10-27.
- The hosting environment is AS36236, operated by NETACTUATE - NetActuate, Inc., US.

What to Verify Next

For enterprise onboarding, confirm the contracting entity, applicable terms, data-processing commitments, and any licensing or registration requirements relevant to the intended deployment through the site’s company and legal materials. Procurement teams should also validate support and escalation channels through an independent business record or established vendor contact process.

- The Company and About Us pages provide the primary identity and history materials.
- The Contact Us and Knowledge Base pages provide operational support routes.
- The homepage describes the software integrations relevant to deployment review.

Summary Verdict

Databias is a legitimate, established business-services website with a high-trust posture and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves to a direct hosting environment operated by NetActuate in the United States, with no CDN detected and a single likely origin address. This is a conventional, coherent hosting posture and does not introduce a material integrity concern.

Closing Assessment

Prospective customers may proceed with normal evaluation, onboarding, and use under standard enterprise procurement and access-control procedures.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of databias.io.

- The request stayed on databias.io. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by co.za, across 3 name servers. NOTED
- The registration is paid up to 2027-03-29. NOTED
- It is hosted on NETACTUATE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about databias.io at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
