

Is dbetatech.com.ng a scam? TrustSniffer's high-risk assessment: 0/100

dbetatech.com.ng

Verdict

0

OUT OF 100

CRITICAL RISK

dbetatech.com.ng shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Single-line placeholder page: 'This Website is Under Construction' repeated; no links, forms, or metadata found.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	4 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	3.9 years old Registered history	CLEAR
Web archive	Archived since 2018 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR1	NOTED

This Website is Under Construction

What dbetatech.com.ng served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a parked, under-construction domain presenting only the repeated message “This Website is Under Construction.” It offers no identifiable service, product, commercial proposition, or visitor action, and its apparent current state is an inactive or reserved web presence rather than an operating business.

Scam/Impersonation Risk

Clear external contradictions are present despite the absence of an on-page login form, payment request, phishing content, or detected brand impersonation. Independent security assessments recorded malicious and suspicious detections, and the domain is blacklisted by multiple external sources; this materially outweighs the benign, minimal homepage content. The lack of an active service means the page does not currently expose a substantial interaction surface, but the domain should not be treated as safe for future sensitive use merely because the present page is inactive.

EVIDENCE

- The homepage contains only the repeated under-construction message and has no links, forms, or service disclosures.
- External security evaluations recorded 4 malicious detections and 1 suspicious detection; a tier-one security vendor also flagged the domain.
- The domain is recorded as blacklisted by external sources.
- The domain was registered in 2022 and is approximately 3.87 years old; archive records contain 31 snapshots spanning 2018–2024, covering 7 tracked years.

Regulatory Verification Notes

The available page does not identify a legal entity, regulated activity, licensing authority, or registration number. This is a disclosure and verification gap rather than proof of unlawful operation, particularly because the site currently presents no operating service; however, the real-world operator remains unverified and the available evidence does not support regulated-entity status. A local broker-reputation dataset produced no matching record, which is contextual only and does not establish licensing or legitimacy.

EVIDENCE

- The homepage provides no company name, legal notice, terms, privacy disclosure, license claim, or registration number.
- Domain registration identifies GO54 Limited, formerly Whogohost Limited, as registrar.
- The domain resolves through AS19437, operated by SS-ASH - SECURED SERVERS LLC in the United States.
- Transport encryption uses a DV TLS certificate issued by YR1, valid through 2026-11-09.

What to Verify Next

Before any future interaction becomes available, an independent check should confirm the operator's legal identity and any claimed authorization with the relevant corporate or financial-services registry. Any request for credentials, payment, downloads, or account creation should be evaluated only after the domain's external security warnings have been independently resolved and the official contact route has been confirmed through an offline or separately established channel.

EVIDENCE

- Browser testing completed 2 successful runs with an HTTP 200 response ratio of 1.0 and no detected external XMLHttpRequest or fetch activity.
- Browser testing recorded 24 console errors, indicating unresolved technical defects in the current page.
- Synthetic-response analysis measured 92.3%, while the maximum observed external-activity ratio was 92.9%; these signals warrant reassessment if the site becomes operational.

Summary Verdict

The website has a **critical trust posture** and presents sensitive-interaction risk. Its inactive homepage limits immediate exposure, but the confirmed external security contradictions and unverified operator identity prevent

a defensible legitimacy conclusion.

Infrastructure Integrity

The site resolves directly to a single origin endpoint, with no detected CDN or WAF layer and no edge-IP distribution. This architecture provides limited protective mediation and should be regarded only as a technical characteristic, not as evidence of malicious intent or legitimacy.

Closing Assessment

Prospective users should maintain a read-only posture and avoid login, credential submission, downloads, or financial activity unless independent identity, authorization, and security checks produce a materially different result.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dbetatech.com.ng.

- The request stayed on dbetatech.com.ng. It was not redirected to another domain. CLEAR
- Registration is published under GO54 Limited (formerly Whogohost Limited). CLEAR
- DNS for this domain is served by whogohost.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-09. NOTED
- The earliest public archive of this site is from 2018-01-05. CLEAR
- It is hosted on SS-ASH, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dbetatech.com.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
