

# Is dcnvda.org a scam? TrustSniffer's high-risk assessment: 19/100

dcnvda.org

## Verdict

19

OUT OF 100

CRITICAL RISK

dcnvda.org shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

County District Attorney informational site containing mission statement, divisions, victim services, forms, alerts, and calendar. No signs of monetization or requests for payments/credentials.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

What dcnvda.org served when TrustSniffer captured it on 2026-08-22. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Overview

The website is an informational county District Attorney portal presenting legal divisions, victim-assistance resources, public forms, alerts, court and board calendars, county information, and contact options; its apparent purpose is to provide public-sector legal and community services rather than to conduct commercial or financial activity.

### Scam/Impersonation Risk

The site's visible content is consistent with a government public-service information portal and contains no payment requests, login form, credential collection, or monetization flow. However, this benign presentation is outweighed by material external contradictions: the domain has confirmed blacklist detections, multiple malicious classifications, and a known phishing-related signal in the broader assessment. The associated address has also accumulated substantial abuse reporting, although those reports are attributed to shared data-center infrastructure rather than conclusively to this website itself. Accordingly, the apparent government presentation must not be treated as proof of authentic county operation or safe sensitive interaction.

#### EVIDENCE

- The homepage and site navigation present District Attorney divisions, victim services, county information, alerts, forms, and calendars, with no visible payment or credential request.
- External reputation checks recorded 3 malicious and 1 suspicious classification, together with a confirmed blacklist hit.
- The hosting address 216.245.218.90 has 72 abuse reports attributed to shared Limestone Networks infrastructure.
- The domain registration record shows creation on 2009-12-10T13:32:34Z and an age of 16.71 years.

#### Regulatory Verification Notes

The supplied pages support an apparent public-sector business model, including a mission statement, victim services, legal resources, and county-related information. Nevertheless, the real-world operator identity remains unverified, and the supplied content does not provide an independently confirmed government affiliation or licensing/registration reference. For a government information site, that is a significant identity and disclosure gap rather than evidence of a commercial licensing violation. The long-established registration, GoDaddy registrar, valid transport encryption, and ordinary informational page structure are positive technical and content signals, but they do not resolve the external blacklist contradiction.

#### EVIDENCE

- The mission statement and navigation identify a District Attorney office model with civil, criminal, investigations, and victim-witness functions.
- The registration record lists GoDaddy.com, LLC as registrar.
- The site is served from AS46475, Limestone Networks, Inc., US.
- The TLS certificate is DV, issued by Sectigo Public Server Authentication CA DV R36, and valid to 2026-11-07T23:59:59+00:00.

#### What to Verify Next

Independent confirmation should be obtained from an official county or state government directory that is reached through a separately sourced channel, not through links or contact details supplied solely by this domain. The county's independently published switchboard or records office should confirm whether this domain is authorized for District Attorney information and whether its listed contact routes are official. Until that confirmation is obtained, any request for personal information, document submission, authentication, or payment should be matched against the county's established offline or independently published procedures.

#### EVIDENCE

- The site includes "Contact Us" and "County Information" sections that can be compared with independently sourced county records.
- The site publishes victim-assistance resources, forms, alerts, and legal information that should correspond to an independently verifiable public-service office.
- The page capture completed successfully with HTTP status 200 and contained substantive page text.

Summary Verdict

The overall posture is **critical trust risk** with a high risk of sensitive interaction. The site appears informational and government-themed, but the external reputation contradictions and unresolved operator identity prevent the apparent public-service presentation from supporting trust in login, credential, financial, or other sensitive activity.

Infrastructure Integrity

The site is associated with Limestone Networks infrastructure, and no trusted CDN or WAF mitigation is established in the supplied infrastructure facts. The valid TLS deployment protects transport confidentiality but provides only domain control validation, not proof of government ownership or operational legitimacy.

Closing Assessment

Restrict activity to passive reading until independent county authorization is confirmed, and do not submit credentials, sensitive personal information, documents, or payments through the site.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.  
Registration and ownership rule:KF\_WHOIS\_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat

Signals weighed against the site

- AbuseIPDB: 72 reports on hosting IP 216.245.218.90 (Limestone Networks, Inc., Data Center/Web Hosting/Transit), 100% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of dcnvda.org.

- The request stayed on dcnvda.org. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by visionasphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-10. NOTED
- The earliest public archive of this site is from 2010-07-19. CLEAR
- It is hosted on LIMESTONENETWORKS, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about dcnvda.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
