

Is ddtech.mx legit? TrustSniffer's high-trust assessment: 80/100

ddtech.mx

Verdict

80

OUT OF 100

HIGH TRUST

ddtech.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Spanish-language ecommerce site (DD Tech) listing many computer components, gaming systems, accessories, product prices and store contact details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

DD Tech is a Spanish-language ecommerce website presenting computer components, gaming PCs, peripherals, accessories, product prices, store information, and customer-contact options for an online retail and in-store-pickup business.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent electronics-retail proposition, with detailed product categories, store-related information, and contact details rather than indicators of phishing, brand impersonation, or an abusive financial scheme. External reputation checks returned no malicious or suspicious detections, and the site's long-running, continuous historical presence is consistent with an established commercial operation. The available evidence therefore supports an apparently legitimate, low-risk retail website, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage is classified as an ecommerce product catalogue and contains detailed listings for computer hardware, gaming systems, peripherals, and accessories, with no reported red flags.
- Domain registration: created 2015-08-20; age 10.98 years; expiration 2027-08-20.
- Archive records: 1,012 snapshots, first seen 2015-12-16, last seen 2026-05-26, with 12 years tracked.
- The external reputation assessment recorded 0 malicious detections, 0 suspicious detections, and no reported brand-impersonation indicators.

Regulatory Verification Notes

The site appears to operate as a consumer electronics retailer rather than a regulated financial service. The captured content does not present a license or registration number, so applicable consumer-commerce, tax, or business-registration details remain a transparency item for independent confirmation rather than evidence of misconduct. The site identifies itself as DD Tech, but the real-world operator has not been independently verified. Domain registration is through GoDaddy.com. A valid transport-encryption certificate and established hosting arrangement support technical continuity, but neither establishes legal ownership or regulatory authorization.

EVIDENCE

- The captured navigation includes “Nosotros,” “Contacto,” “Ayuda,” store-related sections, and account functions, but no license number is shown in the supplied page content.
- Hosting: AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS certificate: issuer WE1, validation level DV, valid to 2026-10-23T22:17:42+00:00.
- The domain registrar is recorded as GoDaddy.com.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the merchant’s legal name, physical trading identity, applicable consumer-commerce registration, return terms, warranty handling, and payment-dispute protections. The store information presented by the site can also be compared with independently obtained business records or an offline contact route; any account-registration or purchase workflow should be reviewed for consistency with those details.

EVIDENCE

- The captured site includes account login and registration functions alongside a purchase function, making credential handling and payment protections relevant pre-transaction checks.
- The stated business model includes in-store pickup, providing a potential offline basis for confirming merchant identity and fulfilment arrangements.
- The page content identifies store locations and contact/support topics as principal business information.

Summary Verdict

The overall posture is **high trust and low risk**, with available evidence consistent with an established, apparently legitimate website. The classification supports ordinary use in principle, but it does not constitute independent proof of the operator’s real-world identity.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN/WAF infrastructure, with observed addresses belonging to Cloudflare edge servers and no origin-server address identified in the infrastructure assessment. This reduces direct exposure of the underlying host and is a mitigating technical control, not proof of merchant legitimacy.

Closing Assessment

Prospective users should complete ordinary independent merchant-identity, return-policy, and payment-protection checks before entering credentials or making payments.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

UNVERIFIED

Identity score	55/100
Identity verification confidence	30%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ddtech.mx.

- The request stayed on ddtech.mx. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-20. NOTED
- The earliest public archive of this site is from 2015-12-16. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ddtech.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
