Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Dealabs is an established French community platform for user-submitted shopping deals, discount codes, discussions, consumer news, and links to external retailers, operating as a deal-discovery and affiliate-supported commerce service.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or blacklist findings were observed. The homepage presents a coherent consumer-commerce model across electronics, travel, groceries, fashion, gaming, and other categories, with no sensitive submission forms, wallet activity, credential-harvesting behavior, or deceptive financial features. Its long-established domain, extensive historical continuity, strong global traffic footprint, and clean external reputation support the conclusion that Dealabs is a legitimate established platform.

- Domain registered in 2010 (~15.6 years old); registrar: Gandi SAS.
- 5,000 archive snapshots spanning 2009–2023 (15 years tracked), with no suspicious repurposing identified.
- Homepage behavior recorded no hidden forms, external posting activity, wallet connections, or cloaking.

Regulatory Verification Notes

Dealabs presents a shopping-community and retailer-referral model rather than a regulated financial service. The supplied content does not display a financial license number or regulated-service authorization; this is a transparency point relevant only if a specific linked merchant or offer makes regulated claims. Registration information associates the domain with Atolls Germany GmbH, while registrant privacy remains an administrative matter. The available external reputation context contains no broker match or adverse finding.

- Homepage identifies the service as “Dealabs – La communauté de bons plans n°1 en France” and provides shopping, discussion, and consumer-news categories.
- Served from AS13335, Cloudflare, Inc.; registry: ARIN.
- TLS certificate issued by YE1 (DV), valid to 2026-09-18.
- WHOIS organization: Atolls Germany GmbH; registrar: Gandi SAS.

What to Verify Next

For any particular purchase or promotion, confirm the destination retailer’s terms, pricing, returns policy, and payment protections directly on the retailer’s established checkout domain. Where a linked offer involves a regulated product, confirm the responsible provider’s authorization with the applicable official registry.

- The homepage links visitors to external merchants including Amazon France, AliExpress, Veepee, Decathlon, and Boulanger.
- The platform’s stated function is deal discovery and discussion rather than custody of customer funds.

Summary Verdict

Dealabs has a high-trust posture consistent with a legitimate, established consumer-commerce community. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site benefits from Akamai and Cloudflare CDN/WAF protection, with Cloudflare identified as the hosting provider. This protective, distributed infrastructure mitigates direct exposure and supports service resilience, although infrastructure protection is a supporting control rather than proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard account actions are appropriate; purchase decisions should remain subject to the terms and protections of the destination merchant.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dealabs.com.

- The request stayed on dealabs.com. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-31. NOTED
- The earliest public archive of this site is from 2009-08-31. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dealabs.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
