

Is dealclub.de legit? TrustSniffer's high-trust assessment: 100/100

dealclub.de

Verdict

100

OUT OF 100

HIGH TRUST

dealclub.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-01 by automated analysis. Classification confidence 75%.

What this site appears to be

Dealclub.de presents itself as a German discount and deal-shopping platform. The supplied page content is dominated by cookie-consent details and disclosures for analytics, advertising, affiliate, PayPal, video, and social-media tracking services.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Dealclub.de presents itself as a German discount and deal-shopping platform offering substantially reduced product offers through affiliate referrals, advertising, and partner-driven commerce transactions.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a conventional ecommerce model, with no phishing indicators, credential-harvesting forms, brand impersonation, deceptive financial claims, or cryptocurrency activity. Extensive cookie, advertising, analytics, payment, and embedded-media integrations are consistent with the stated commercial model rather than evidence of malicious behavior.

- The homepage identifies Dealclub.de as a discount-shopping and product-offer portal.
- Homepage analysis found no login form, sensitive form, hidden form, or untrusted submission destination.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or impersonation finding.
- The domain is 14.8145106091718 years old; 2,142 archive snapshots span 2011-10-07 to 2026-02-17 across 16 years.

Regulatory Verification Notes

The available content is consistent with consumer ecommerce rather than a regulated financial service, and no financial license claim is evidenced. The cookie-consent disclosures describe analytics, advertising, affiliate, payment, video, and social-media data sharing in detail. No adverse broker-reputation match was identified.

- The homepage's cookie notice documents consent categories and partner data-sharing purposes.
- Hosting telemetry identifies CLOUDFLARENET - Cloudflare, Inc., US.
- The site uses a DV TLS certificate issued by WE1, valid until 2026-09-24T09:45:11+00:00.
- No matching third-party broker record was found.

What to Verify Next

Before a material purchase, confirm the transaction-specific seller, delivery, refund, and payment terms displayed at checkout or in the applicable legal pages. Official support and contact channels should be confirmed through an independent route when a transaction requires assistance.

- The supplied homepage content describes partner-driven commerce and affiliate referrals.

- The supplied content contains no financial license number or regulated-service claim requiring validation.

Summary Verdict

Dealclub.de is a legitimate, established, high-trust ecommerce website with a coherent business model and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare's CDN/WAF protects the site, and all observed addresses were CDN edge infrastructure; no origin candidate was identified. This provides a meaningful defensive layer and reduces direct origin exposure, while remaining a mitigating infrastructure signal rather than proof of legitimacy.

- The site is served through AS13335, Cloudflare, Inc.
- Six observed addresses were identified as CDN edge addresses, with zero likely origin addresses.

Closing Assessment

Prospective users may proceed with normal site use and ordinary transactions, applying routine purchase checks appropriate to any online retailer.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dealclub.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
