Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Dealroom.co is a commercial SaaS and data-intelligence platform for startup and venture ecosystems, presenting company, investor, funding, research, integration, and enterprise-access capabilities to investors, governments, and corporate users.

Scam/Impersonation Risk

No contradictions were observed across the reviewed content and technical signals: there is no indication of phishing, brand impersonation, malicious distribution, or conflicting identity claims. The homepage contains a conventional login, newsletter, and trial/contact flow, but no hidden forms, wallet activity, or external password-capture destination was identified. Behavioural testing recorded substantial page changes and some non-whitelisted network activity; these are attributable to the interactive marketing site and were not accompanied by cloaking, wallet-drainer behaviour, clipboard manipulation, or other abuse patterns. The available evidence is therefore consistent with an established, apparently legitimate website, while independently connecting it to a real-world operator remains unresolved.

EVIDENCE

- The homepage presents a SaaS/data-platform landing page with login, newsletter-subscription, and request-trial/contact forms; no untrusted form destination or hidden form was identified.
- External reputation results recorded 0 malicious and 0 suspicious detections, with no malicious-site designation and 0 abuse reports for the observed shared infrastructure.
- The domain was registered on 2013-01-21T12:14:45Z and is 13.56 years old; registration is through GoDaddy.com, LLC.

Regulatory Verification Notes

The reviewed content describes a commercial information service rather than presenting itself as a bank, broker, investment venue, or other regulated financial intermediary. It does not present a licensing claim or license number in the reviewed landing-page material, so any regulated-service assumption would require separate confirmation; this is a disclosure and verification point, not evidence of deception. The commercial model, enterprise positioning, substantive product descriptions, pricing/trial pathway, and client-facing research content are coherent with a mature B2B data platform. A separate broker-dataset check produced no match, which is contextual reputational support rather than a legal or licensing determination.

EVIDENCE

- The homepage identifies the service as “Intelligence for Tech Ecosystems” and describes premium access, API/MCP integrations, ecosystem measurement, reports, funding dashboards, and enterprise-oriented use.
- The domain’s registrar is GoDaddy.com, LLC; the listed registration expiration date is 2029-01-20T23:59:59Z.
- Hosted on AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS certificate: GoDaddy TLS Intermediate CA DV - R1v1, DV validation, valid to 2026-12-27T10:35:45+00:00.

What to Verify Next

Before a credentialed or paid engagement, the prospective contracting party should independently confirm the legal entity named in the commercial agreement, review subscription cancellation, renewal, refund, and data-use terms, and ensure that payment protections are appropriate to the transaction. Contact channels should be confirmed through an independently sourced route, and any representation that a particular service is regulated should be checked against the relevant official register rather than inferred from the platform’s market audience.

EVIDENCE

- The reviewed material provides a trial/contact pathway and subscription-oriented access, making contracting-entity and commercial-terms checks directly relevant.
- The site’s stated audience includes investors, governments, and corporates, but the evidence does not independently verify the real-world operator behind the domain.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam or impersonation contradictions were observed. The principal qualification is that the real-world operator identity has not been independently verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than an exposed origin address. This provides a meaningful mitigation against direct origin exposure and common availability or abuse patterns, but remains an infrastructure safeguard rather than proof of corporate legitimacy.

EVIDENCE

- Cloudflare edge addresses observed: 104.17.196.17, 104.17.197.17, 2606:4700::6811:c411, and 2606:4700::6811:c511.
- Origin server IP candidates observed: 0; edge IPs observed: 4.

Closing Assessment

Normal browsing and ordinary platform evaluation are proportionate to the available evidence; credential or payment activity should follow the independent entity, commercial-terms, and payment-protection checks set out

above.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dealroom.co.

- The request stayed on dealroom.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-01-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dealroom.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
