The page as captured

<https://debank.lt/>

What debank.lt served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

debank.lt is a Lithuanian-language WordPress blog presenting articles on health, nutrition, supplements, beauty, recipes, home improvement, construction, and local services in Kaunas. Its apparent business model is informational content supported by advertising, affiliate activity, and referrals rather than regulated financial services.

Scam/Impersonation Risk

Confirmed external security detections and blacklist status create a material risk contradiction despite the site presenting as an ordinary content blog. Seventeen malicious detections were recorded, including threat detections from two established security vendors, and the domain is subject to confirmed blacklist findings. No conflicting legal-entity names or direct brand-impersonation indicators were observed in the supplied page content, and the site did not present a login form, sensitive form, wallet connection, or other interactive mechanism during inspection. The benign-looking page model therefore does not offset the external threat evidence. The site should be treated as unsuitable for credential, payment, or other sensitive interaction.

EVIDENCE

- The homepage is classified as a Lithuanian health and lifestyle blog and contains articles on supplements, beauty, recipes, and home improvement rather than a clearly identified regulated service.
- External security assessment recorded 17 malicious detections and a confirmed blacklist status; two enterprise security vendors also flagged the domain.
- The homepage contained no login form, sensitive form, hidden form, wallet connection, or suspicious browser behavior during the observed runs.
- Archive records show 28 snapshots from 2023 through 2026, covering 4 years tracked, with no confirmed repurposing or semantic category drift.

Regulatory Verification Notes

The site's apparent publishing model does not itself indicate a regulated financial or investment service. However, the available content does not independently establish the responsible legal entity, and the on-page disclosure position is unclear. No license claim, licensing authority, or registration number was identified in the supplied evidence. This is a transparency and verification gap rather than, standing alone, proof of fraud; in this case, it must be considered alongside the confirmed external blacklist and malicious-detection findings. The site's identity remains unverified.

EVIDENCE

- The homepage title is "debank.lt – debank.lt," while displayed articles are attributed to "Viktoras Viktoras"; no independently verified corporate identity is supplied.
- No license claim, licensing authority, or license number appears in the available site analysis.
- Domain registration data records creation on 2025-12-05, with an observed age of 0.71 years and an expiration date of 2026-12-06.
- The site's transport encryption uses a DV certificate issued by YR2, valid through 2026-11-12.

What to Verify Next

Before any sensitive interaction, an independent party should confirm the operator's legal identity through an authoritative business registry and establish whether the published material is connected to a legitimate organization. Any commercial, health-related, or referral claim should be checked against the underlying provider rather than relied upon solely on the blog. Contact channels should be confirmed through an independent, offline route, and endpoint security or threat-intelligence teams should review the blacklist status before allowing organizational access. Passive reading is the only proportionate use while these checks remain unresolved.

EVIDENCE

- The homepage presents health and supplement content, including claims concerning ashwagandha, without supplied evidence of named medical authorship or professional oversight.
- The site presents local-service material concerning plastic windows and laser hair removal in Kaunas, but the supplied pages do not independently establish the relevant service providers.
- The observed site behavior was stable, with two successful inspection runs, no external requests, and no detected cloaking or hidden sensitive forms.
- The available authority signal places the site in a mid-level page-authority band, which is contextual only and does not validate ownership or safety.

Summary Verdict

The overall posture is **critical risk**, driven by a decisive conflict between the site's apparently routine editorial presentation and confirmed external threat intelligence. The operator's identity is not independently verified, and the available evidence does not support sensitive interaction or reliance on the site for consequential decisions.

Infrastructure Integrity

The domain resolves directly to infrastructure operated by IST-AS - UAB Bacloud, LT, without a detected CDN or WAF layer; two likely origin addresses were identified. This provides limited infrastructure-based mitigation, although the site has functioning TLS protection.

EVIDENCE

- Hosted on AS61272, IST-AS - UAB Bacloud, LT, in Lithuania.
- TLS certificate issuer: YR2; validation level: DV; valid to 2026-11-12T15:14:25+00:00.
- Infrastructure analysis identified 2 unique IP addresses, 0 edge IPs, and 2 likely origin IPs; no CDN was detected.

Closing Assessment

Organizational controls should restrict the site to passive, read-only access and prevent credential submission, payment activity, downloads, or other sensitive engagement unless independent identity and security checks produce a clear resolution.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of debank.lt.

- The request stayed on debank.lt. It was not redirected to another domain. CLEAR
- The registration is paid up to 2026-12-06. NOTED
- The earliest public archive of this site is from 2023-11-26. CLEAR
- It is hosted on IST-AS, from a server in LT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [debank.lt](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
