Full analysis

Overview

Debonairs Pizza is a branded restaurant and food-delivery website presenting menus, specials, online ordering, delivery, store locations, customer support, franchising, gift cards, and brand information for the sale of pizza and related food products.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, technical, and reputation signals. The homepage presents a coherent restaurant business model, with ordinary ordering paths, store-location functionality, nutritional information, customer care, and franchising content rather than deceptive financial or credential-harvesting mechanics. The published site content contains no identified phishing, impersonation, or malicious indicators.

- The homepage identifies Debonairs Pizza and provides menu, ordering, delivery, and store-locator functions.
- The site's archive contains 194 snapshots spanning 2006–2026, covering 21 tracked years.
- The domain was registered on 2004-02-26 and is approximately 22.45 years old.

Regulatory Verification Notes

The site operates as a consumer restaurant and ecommerce service rather than presenting itself as a regulated financial provider. Its pages include brand history, customer care, franchising, nutritional information, and ordering support; no specific regulatory license or registration number is presented in the supplied content, which is a limited disclosure point for corporate verification rather than evidence of misconduct. The domain registration record identifies Famous Brands Management Company (Pty) Ltd and Lexsynergy Limited.

- The homepage links to "Our Story," "Our History," "Our Footprint," "Customer Care," and "Franchising."
- Hosting is on AS37153, operated by Xneelo (Pty) Ltd.
- The TLS certificate is DV-validated, issued by YR1, and valid until 2026-10-27.
- The domain registrar is Lexsynergy Limited, with registration recorded on 2004-02-26 and expiry on 2027-02-26.

What to Verify Next

For procurement or franchise engagement, the relevant business-registration and contractual details should be confirmed through the applicable corporate or franchise documentation. Customer-care and ordering channels

should also be cross-checked against independently obtained brand information before entering into a material commercial arrangement.

- The homepage provides customer-care and ordering pathways.
- The site presents franchising as a distinct business service.
- The site provides store-location and delivery information that can be checked against the selected outlet.

Summary Verdict

The website presents as a legitimate, established, and trustworthy consumer-commerce presence with a coherent business purpose and no observed impersonation or fraud contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Xneelo in South Africa, with no CDN or WAF edge layer identified. Its valid mainstream TLS certificate provides transport protection, while the hosting arrangement is best treated as a mitigating technical control rather than proof of legitimacy.

Closing Assessment

Standard ordering, account, and customer-service interactions are appropriate; higher-value franchise or commercial commitments should follow ordinary independent business verification.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about debonairspizza.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
