Full analysis

Overview

The website is an online Decathlon Morocco retail storefront presenting sporting goods and accessories across categories such as swimming, running, camping, cycling, football, footwear, and clothing, with local pricing, promotions, product reviews, delivery services, and standard direct-sales functionality.

Scam/Impersonation Risk

No contradictions were observed. The homepage's structure, product catalogue, Moroccan pricing, reviews, delivery messaging, and brand presentation are consistent with an established sporting-goods retailer, and no phishing, impersonation, or other page-level fraud indicators were identified. Independent reputation checks returned no malicious or suspicious detections, while the site's sustained historical presence and established web footprint further support an apparently legitimate provenance. These signals support a low scam and impersonation risk assessment, although they do not independently prove the real-world operator's identity.

EVIDENCE

- The homepage is classified as an ecommerce retail storefront with no reported red flags or suspected brand impersonation.
- Independent reputation checks recorded 0 malicious and 0 suspicious detections; no blacklist or phishing finding was identified.
- The domain was registered on 2008-09-17 and is recorded as 17.91 years old.
- Web archives contain 1,950 snapshots spanning 2016–2026, covering 11 tracked years; the site is ranked 83223 and remains within the top 1 million sites.

Regulatory Verification Notes

The available evidence is consistent with an established commercial website, but the real-world operator identity remains independently unverified. The registration record names DECATHLON and identifies MTDS as registrar, which supports the apparent brand association without constituting conclusive proof of the operating entity. The available homepage material does not provide a license number or regulator, although ordinary sporting-goods retail does not inherently indicate a regulated financial activity; this is therefore a disclosure point for merchant-identity and consumer-protection verification rather than evidence of wrongdoing. No adverse broker-reputation signal was identified.

EVIDENCE

- The domain registration record lists owner name DECATHLON and registrar MTDS.
- The site is served from AS13335, Cloudflare, Inc., United States.
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-26T12:37:16+00:00.
- The homepage presents product listings, prices in MAD, reviews, delivery information, guarantees, account functions, and cart/checkout capability.

What to Verify Next

Before credential or payment interactions, an independent merchant-identity check should confirm that the commercial entity operating the storefront corresponds to the expected Decathlon Morocco business. The applicable return, delivery, warranty, and payment-protection terms should be reviewed directly, and official support or contact channels should be confirmed through an independent route rather than relying solely on information displayed during a transaction.

EVIDENCE

- The homepage provides account-login and checkout/payment functions.
- The homepage displays delivery and guarantee messaging relevant to a prospective purchase.
- The available evidence identifies the storefront as operating in Morocco and pricing goods in MAD.

Summary Verdict

The overall posture is **high trust and low risk**, with evidence consistent with an established, apparently legitimate retail website. The classification is strong enough to support normal browsing and ordinary shopping consideration, while the absence of independent operator verification means legitimacy should be described as apparent rather than proven.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating on Cloudflare edge addresses and no origin candidate identified in the analysis. This is a meaningful defensive control that mitigates direct exposure of the underlying server, but it is an infrastructure safeguard rather than proof of business legitimacy.

Closing Assessment

Normal use is proportionate to the assessed posture, provided ordinary independent merchant, consumer-policy, and payment-protection checks are completed before submitting credentials or payment details.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about decathlon.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
