

# Is deckshop.pro legit? TrustSniffer's high-trust assessment: 100/100

deckshop.pro

## Verdict

100

OUT OF 100

HIGH TRUST

deckshop.pro appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Deck Shop is an independent, multilingual Clash Royale fan site offering deck discovery, deck evaluation, card information, and gameplay guides. It displays advertisements and promotes an affiliate-style creator code for purchases completed on the official Supercell Store, while explicitly disclosing that it is not affiliated with or endorsed by Supercell.

## Evidence status and limitations

## Key findings

---

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

Deck Shop is an independent, multilingual Clash Royale fan site that provides deck discovery, deck evaluation, card information, gameplay guides, and related utilities, funded through advertising and creator-code referrals for purchases completed through the official Supercell Store.

### Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or other fraud indicators were observed. The site distinguishes itself from Supercell through an explicit non-affiliation disclaimer and presents a coherent informational business model comprising free deck-building tools, player and card lookup functions, guides, advertising, and creator-code support. The absence of login forms, sensitive forms, hidden forms, deceptive redirects, wallet interactions, clipboard manipulation, or cloaking further supports the assessment that the site is not attempting to capture credentials or misrepresent its identity.

- The homepage explicitly describes Deck Shop as independent fan content and states that it is not affiliated with or endorsed by Supercell.
- The homepage contains no login form, sensitive form, hidden form, or form submission to an untrusted destination.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or impersonation finding.
- Domain provenance shows registration on 12 January 2017 (~9.56 years old), while 3,033 archive snapshots span 3 June 2017–5 June 2026 (10 years tracked) without evidence of suspicious repurposing.

### Regulatory Verification Notes

Deck Shop operates as a gaming information and utility service rather than a financial, brokerage, payment, or other regulated service. No regulated activity or licensing claim appears in the supplied page content, making financial-services authorization inapplicable to the observed business model. Its identity presentation is appropriately framed as independent fan content, and the available Privacy Policy and About links provide conventional supporting disclosures for this type of website.

- The homepage categorizes the service through deck-building, deck-checking, card-information, player-lookup, and gameplay-guide functions rather than regulated products.
- The site navigation exposes About and Privacy Policy pages, alongside a link to the Supercell Fan Content Policy.

- The domain is registered through Cloudflare, Inc., with registration valid until 12 January 2027.
- The site’s transport encryption uses a WE1-issued domain-validated TLS certificate, valid to 17 September 2026.

**What to Verify Next**

Routine due diligence should confirm that any creator-code purchase journey terminates on the genuine Supercell Store and that the displayed fan-content disclaimer remains consistent with Supercell’s current policy. Prospective users considering optional community features should also review the Privacy Policy and independently confirm the official Discord bot or community destination before authorizing an external integration.

- The homepage directs creator-code purchases to the Supercell Store rather than presenting an on-site payment workflow.
- The homepage provides a direct reference to the applicable Supercell Fan Content Policy.
- The site navigation identifies a Privacy Policy, a Discord Bot feature, and a problem-reporting channel as the relevant sources for these checks.

**Summary Verdict**

The website is legitimate, established, and trustworthy, with strong convergence among its consistent identity, long operating history, substantial traffic footprint, clean external reputation, and benign observed behavior. Normal interaction, including account login where available and standard use of its utilities, is appropriate.

**Infrastructure Integrity**

The site is protected by Cloudflare’s mainstream CDN/WAF infrastructure. All four observed addresses were Cloudflare edge servers, and no origin-server candidate was exposed; this reduces direct infrastructure exposure but functions as a security mitigation rather than independent proof of legitimacy.

- The hosting infrastructure serves the site from AS13335 (Cloudflare, Inc., United States).
- DNS observations resolved to four Cloudflare edge addresses—two IPv4 and two IPv6—with no likely origin address identified.

**Closing Assessment**

Prospective users may engage with the site normally while applying ordinary care when following external purchase or community-integration paths.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of deckshop.pro.

- The request stayed on deckshop.pro. It was not redirected to another domain. CLEAR
- Registration is published under Cloudflare, Inc. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-12. NOTED
- The earliest public archive of this site is from 2017-06-03. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about deckshop.pro at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
