

Is decoratorart.ro safe? TrustSniffer's low-trust assessment: 40/100

decoratorart.ro

Verdict

40

OUT OF 100

LOW TRUST

decoratorart.ro is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A short Romanian-language landing/marketing snippet advertising decorative painting and interior design services (keywords related to painting, lazura, design interior). No forms or calls-to-pay present in the captured HTML.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://decoratorart.ro/>

What decoratorart.ro served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

decoratorart.ro is a Romanian-language local-service website presenting decorative painting, interior decoration, lazura finishes, wall painting, and interior-design services. Its apparent business model is to generate service enquiries and client projects rather than process online payments or provide financial products.

Scam/Impersonation Risk

A confirmed external blacklist hit is the principal contradiction and supports a clearly cautionary assessment, even though the captured homepage does not display overt malicious mechanics. No separate identity-name conflict or brand-impersonation indicator was observed. The page presents a plausible local-service theme, but its very limited content provides little independent corroboration of the operator or business. The site should therefore be treated as unsuitable for sensitive interaction until the blacklist finding and operator identity are independently resolved.

EVIDENCE

- External reputation analysis records 1 malicious and 2 suspicious detections among 3 evaluated results, together with an external blacklist hit.
- The homepage contains approximately 140 characters of Romanian marketing text and no forms, payment calls, login fields, or captured sensitive-input workflow.
- The domain was registered on 2006-09-27 and is approximately 19.91 years old; archive records show 35 snapshots spanning 2008–2025, covering 18 years.

Regulatory Verification Notes

The available site material does not disclose a licensing claim, license number, or clearly identified legal operator. This is a regulatory and transparency verification gap rather than, by itself, proof of fraud. Independent identity verification remains unavailable from the supplied site evidence, while the registration record identifies Romarg SRL as the registrar. The website uses valid domain-validated transport encryption, but that confirms encrypted delivery rather than the legitimacy of the business or its operator.

EVIDENCE

- The captured site material contains no stated license authority or license number.
- The site is hosted by ROMARG - ROMARG SRL, RO, on AS205275.
- The TLS certificate is issued by YR2, uses DV validation, and is valid to 2026-09-27T18:04:37+00:00.

What to Verify Next

Before any sensitive engagement, an independent check should confirm whether the named service operator exists in the relevant Romanian business registry and whether any required local trade, contracting, or consumer-protection disclosures apply. The contracting party, physical business details, quotation or invoice identity, and payment recipient should be matched before a booking or advance payment. Official contact channels should also be confirmed through an independently sourced route, and any blacklist finding should be investigated with the relevant security or hosting provider.

EVIDENCE

- The homepage has no visible legal, licensing, or corporate-identification disclosure in the captured material.
- No external links or social-presence domains were identified in the captured page.
- The page lacks a title, meta description, canonical reference, and detected structured-data markup.

Summary Verdict

The overall posture is low trust with elevated risk for sensitive interaction. The website's benign apparent service theme does not outweigh the confirmed external reputation contradiction and the unresolved operator-identity question. Ordinary browsing may be limited to non-sensitive review, but the site is not presently suitable for login, credential submission, or financial engagement.

Infrastructure Integrity

The site resolves directly to a ROMARG-hosted origin rather than a detected CDN or WAF edge, so the infrastructure provides limited protective separation between the public service and its hosting endpoint. This is a mitigating technical observation only and does not establish legitimacy.

EVIDENCE

- Infrastructure resolution identifies 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN or WAF vendor was detected.
- The resolved hosting country is Romania, with registry attribution to RIPE NCC.

Closing Assessment

Sensitive actions should be deferred unless independent operator, contractual, payment, and reputation checks produce satisfactory results; any engagement should remain limited to non-sensitive review in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of decoratorart.ro.

- The request stayed on decoratorart.ro. It was not redirected to another domain.

CLEAR
- Registration is published under Romarg SRL.

CLEAR

- DNS for this domain is served by romarg.com, across 4 name servers. NOTED
- The earliest public archive of this site is from 2008-08-02. CLEAR
- It is hosted on ROMARG, from a server in RO. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about decoratorart.ro at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
