- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

得到APP is an established Chinese online-learning platform presenting paid courses, audiobooks, lectures, memberships, interactive learning, and enterprise knowledge-management services. Its apparent business model is the sale of digital education content and related learning services, supported by live educational programming and account-based access.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious reputation findings were observed. The homepage presents a coherent education service with course categories, live lectures, user accounts, and learning functions rather than deceptive financial or cryptocurrency mechanisms. Normal account login and standard platform use are therefore appropriate.

- The homepage identifies an educational platform offering courses, audiobooks, interactive learning, live lectures, and enterprise knowledge services.
- The site's historical record contains 333 archive snapshots across 7 tracked years, from 2020-09-21 through 2026-05-23, with no suspicious repurposing identified.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The legal and policy material identifies Beijing Youshimi Network Technology Co., Ltd. and provides customer-service contacts, registration information, operating-license information, privacy terms, and user policies. The supplied evidence does not establish independent third-party regulatory status, so any jurisdiction-specific obligations should be confirmed separately; this is a verification matter rather than evidence of deception.

- The homepage and associated legal content identify Beijing Youshimi Network Technology Co., Ltd.
- The legal and policy pages provide registration, operating-license, privacy, and user-policy information.
- The domain was registered through 阿里云计算有限公司 (万网) on 2014-03-17 and has an observed age of 12.38 years, expiring on 2029-03-17.
- TLS is issued by RapidSSL TLS RSA CA G1 at DV validation level and is valid through 2027-02-13; hosting is on AS37963, ALIBABA-CN-NET.

What to Verify Next

For regulated or enterprise use, confirm the applicable business registration and any sector-specific authorization through the relevant official registry, and independently confirm the published support channels before establishing contractual or payment arrangements.

- The legal pages provide the corporate identity and registration-related disclosures to be checked against the relevant registry.
- The site publishes privacy and user policies that can be reviewed before account-based use.
- The homepage provides customer-service contact information for independent channel confirmation.

Summary Verdict

The website presents as a legitimate, established, and trustworthy online-learning service with a coherent operating model, consistent identity, sustained historical presence, and clean external reputation. The evidence supports normal interaction, including login, account activity, and standard use.

Infrastructure Integrity

The site resolves directly to infrastructure associated with AS37963 and Hangzhou Alibaba Advertising Co., Ltd. in China, with no CDN or WAF detected and two likely origin addresses observed. This provides identifiable hosting context, although the infrastructure itself is only a mitigating technical signal and does not independently establish legitimacy.

Closing Assessment

Prospective users and enterprise counterparties may proceed with normal platform engagement, while applying ordinary checks appropriate to any paid digital service or institutional relationship.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of dedao.cn.

- The request stayed on dedao.cn. It was not redirected to another domain. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about dedao.cn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
