

Is deekaymarine.com safe? TrustSniffer's low-trust assessment: 25/100

deekaymarine.com

Verdict

25

OUT OF 100

LOW TRUST

deekaymarine.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Deekay Marine Services Pvt. Ltd. corporate website describing marine surveying and equipment offerings, company history, mission, featured products and client list. Appears informational and B2B-oriented with product/service focus and contact/support details.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Deekay Marine Services Pvt. Ltd.'s website is an informational corporate and business-to-business presence for a marine-technology company, presenting marine surveying equipment, related installation and maintenance services, company information, client references, and contact options for commercial and research organizations.

Scam/Impersonation Risk

The site presents a coherent corporate profile and does not display a login form, payment workflow, wallet connection, or overt financial solicitation. Its homepage describes marine equipment and services, including autonomous surface vehicles, remotely operated vehicles, sonar systems, acoustic Doppler current profilers, and underwater recording systems. However, this benign on-page presentation is materially contradicted by confirmed blacklist findings and several external malicious or suspicious detections. The available evidence does not establish that the website is impersonating a named brand, but the external reputation conflict creates a significant risk for sensitive interaction. No identity contradiction between distinct legal-entity names was observed. Evidence:

- The homepage identifies “DEEKAY MARINE SERVICES PVT. LTD.” and presents a corporate marine-equipment profile without a login or sensitive-data form.
- External reputation assessment recorded 4 malicious and 2 suspicious detections among 6 evaluated detections, with confirmed blacklist status.
- Domain registration records show registration on 2012-12-12, with an age of 13.7 years.
- Historical records show 110 archive snapshots from 2013-05-08 through 2025-12-06, covering 13 years.

Regulatory Verification Notes

The website states that the company was established in the early 1980s to support marine industries in India and describes sales, installation, commissioning, maintenance, and support contracts. These are on-site identity and business claims, not independent proof of the operating entity. No license, registration number, or regulator is claimed in the supplied content; for a marine-equipment supplier this is a transparency and verification matter rather than, by itself, evidence of fraud. The external blacklist status remains the decisive reputational concern, while the absence of a broker-dataset match provides no positive regulatory conclusion. Evidence:

- The About section contains the company history, mission, vision, and quality-policy material.
- The supplied legal and corporate content contains no stated license number, registration number, or named regulatory authority.
- The site resolves through AS396982, operated by GOOGLE-CLOUD-PLATFORM - Google LLC, US.
- The transport certificate is issued by Go Daddy Secure Certificate Authority - G2 at DV validation level and is valid through 2027-03-07.

What to Verify Next

Before any credential submission, financial commitment, procurement activity, or exchange of sensitive business information, the claimed company should be confirmed through an authoritative Indian corporate or industry registry and through an independently obtained telephone or business-record contact route. Any supplier relationship should also be validated using purchase-order controls, independently sourced references, and payment terms that preserve institutional recovery and dispute rights. The relevant external reputation findings should be investigated and resolved before sensitive access is permitted. Evidence:

- The homepage provides company, product, client, and contact sections that can be checked against independently sourced corporate records.
- The supplied analysis records no sensitive form, external password form, wallet connection, clipboard activity, or suspicious inline script during observed interaction.
- The business model is presented as marine-equipment sales and associated service contracts rather than an on-site financial service.

Summary Verdict

The website has a low-trust posture and presents sensitive-interaction risk. Its professional corporate content and stable technical presentation do not offset the confirmed external reputation contradictions, and the real-world operator identity remains unverified.

Infrastructure Integrity

The site is hosted directly on Google Cloud infrastructure without a detected CDN or WAF edge layer; the resolved address appears to be a direct origin rather than a distributed protective edge. The valid domain-

validated certificate is a basic transport safeguard, but infrastructure controls do not neutralize the external reputation risk. Evidence:

- Infrastructure records show 1 unique IP, 0 edge IPs, and 1 likely origin IP candidate.
- No CDN was detected, and no WAF vendor was identified in the supplied infrastructure assessment.

Closing Assessment

Sensitive interaction should remain suspended unless independent corporate verification and resolution of the external reputation findings are completed; any interim use should be limited to non-sensitive review of publicly presented information.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of deekaymarine.com.

- The request stayed on deekaymarine.com. It was not redirected to another domain. CLEAR

- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by googledomains.com, across 3 name servers. NOTED
- The registration is paid up to 2028-12-12. CLEAR
- The earliest public archive of this site is from 2013-05-08. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about deekaymarine.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
