

# Is deeppeg.com safe? TrustSniffer's low-trust assessment: 40/100

deeppeg.com

## Verdict

40

OUT OF 100

LOW TRUST

deeppeg.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Deeppeg Training Solution is an online provider of accredited vocational courses in construction, agriculture, and health & safety. The site lists courses with prices, testimonials, and cart functionality; powered by OneBiz and includes a chat widget.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

<https://deepeg.com/>

What deepeg.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Overview

This website is an online vocational-training storefront presented as “Deepeg Training Solution,” offering paid courses in construction, agriculture, and health and safety, supported by course listings, prices, testimonials, shopping-cart functionality, account access, and contact support.

### Scam/Impersonation Risk

A confirmed blacklist hit creates a material contradiction to the otherwise ordinary education-oriented presentation and warrants a clearly cautionary posture for sensitive interactions. The site itself did not display detected phishing forms, brand-impersonation indicators, cryptocurrency features, or suspicious external network activity; however, those benign page characteristics do not offset the external blacklist finding. Separate abuse reports relate to the shared hosting IP rather than being uniquely attributed to the website, so they are contextual rather than conclusive evidence of site-level misconduct. The site’s real-world operator identity also remains unverified, and no separate identity contradiction was observed.

#### EVIDENCE

- The external reputation assessment recorded a confirmed blacklist hit for the website.
- The hosting IP address 129.232.137.128 had 3 abuse reports, attributed to shared provider infrastructure rather than uniquely to the site.
- The homepage and account-related interface showed no detected password form, hidden form, wallet connection, or external form submission.
- Domain registration records show registration on 2017-05-03, with an age of 9.3 years.

### Regulatory Verification Notes

The homepage describes the courses as accredited, but the supplied site content does not identify an accrediting authority or provide a registration or accreditation number. That is a substantive verification gap for a provider charging course and enrolment fees, particularly where the customer may rely on the claimed vocational value of the training. The available technical posture provides some positive context: the domain is long-established, the registrar is TUCOWS.COM, CO., and the site uses valid transport encryption; these facts support operational continuity but do not establish the operator's identity or the validity of the accreditation claim. No matching third-party broker profile was identified, which is neutral context rather than regulatory confirmation.

#### EVIDENCE

- The homepage and course catalogue present the courses as accredited vocational programmes but do not name an accrediting authority or display a licence or registration number.
- The domain is registered through TUCOWS.COM, CO.
- The site is served from AS37153 operated by Xneelo (Pty) Ltd - Xneelo (Pty) Ltd, ZA.
- TLS uses issuer YR2 with DV validation and is valid until 2026-11-06 09:02:28 UTC.

### What to Verify Next

Before any paid enrolment, the provider should confirm the claimed accreditation directly with the relevant education or vocational-training authority, using the legal entity name and accreditation reference supplied by the business. The About and Contact pages should be used to obtain a complete business identity, physical address, refund terms, and complaints route, with those details checked through an independent channel. Any payment should use a method offering transaction dispute or chargeback protection, and account credentials should not be reused elsewhere.

#### EVIDENCE

- The site exposes About, Contact, All Courses, and My Account areas, providing specific locations for identity and purchasing checks.
- The storefront uses Add to Cart and contact-form functionality, making business-identity, refund, and payment-protection checks relevant before enrolment.

### Summary Verdict

The overall posture is low trust, with a material contradiction that outweighs the site's coherent educational presentation and established technical operation. The operator's identity and the commercial claims cannot

presently be treated as independently verified, so sensitive interaction risk remains elevated.

Infrastructure Integrity

A CDN/WAF layer is present, with an observed edge server at 13.231.129.208 on AS16509 and hosting infrastructure associated with Xneelo. Potential origin candidates were also observed; the protective layer is a mitigating control that may reduce direct exposure, but it is not evidence of legitimacy.

Closing Assessment

Sensitive actions should be deferred unless the provider’s legal identity, accreditation, refund terms, and payment safeguards are independently confirmed; credentials and payment details should not be submitted while those checks remain unresolved.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

  - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.  
Registration and ownership rule:KF\_WHOIS\_PRIVATE
  - The registration record withholds contact details for the operator.  
Registration and ownership rule:KF\_WHOIS\_HIDDEN
- 02 Sensitive Interaction Risk

  - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat
  - The structure of the page changed sharply while it was loading.  
Behaviour in a sandbox rule:BEHAV\_DOM\_DENSITY\_SPIKE

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 129.232.137.128 (xneelon Managed Network SSL, Data Center/Web Hosting/Transit), 1% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of [deepeg.com](#).

- The request stayed on [deepeg.com](#). It was not redirected to another domain. CLEAR
- Registration is published under [TUCOWS.COM](#), CO.. CLEAR
- DNS for this domain is served by [dns-h.com](#), across 4 name servers. NOTED
- The registration is paid up to 2028-05-03. CLEAR
- The earliest public archive of this site is from 2019-08-17. CLEAR
- It is hosted on Xneelo (Pty) Ltd, from a server in ZA. NOTED

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about [deepeg.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
