

Is defile.ru legit? TrustSniffer's high-trust assessment: 90/100

defile.ru

Verdict

90

OUT OF 100

HIGH TRUST

defile.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

Russian ecommerce homepage for the Defile lingerie brand, featuring categorized merchandise, prices, sizes, sales, gift certificates, store locations, delivery and return resources, customer contacts, newsletter enrollment, and account authentication by phone, email, or Telegram bot.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Russian direct-to-consumer ecommerce operation for the Defile lingerie brand, presenting lingerie, swimwear, clothing, accessories, gift certificates, promotional discounts, and a loyalty programme alongside online purchasing and a network of physical stores.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, malicious reputation findings, or other fraud signals were observed. The long-established domain, meaningful public traffic footprint, consistent retail content, and clean external reputation collectively support the conclusion that this is the legitimate Defile storefront rather than a deceptive imitation.

- The domain registration record shows registration in 2002 and an age of approximately 24 years; the registrar is RU-CENTER-RU.
- Reputation checks recorded 0 malicious and 0 suspicious classifications, while the browsing-safety assessment found no malicious designation.
- The domain ranks 520,235 in the Tranco top one million, demonstrating an established public traffic presence.
- The homepage contains no detected brand-impersonation indicators, deceptive financial-return claims, cryptocurrency mechanics, or listed content red flags.

Regulatory Verification Notes

The business presented is conventional consumer retail rather than a regulated financial, investment, or payment service, so the absence of a financial licence claim is not adverse. The homepage provides substantive commercial context through product pricing and sizing, store locations, delivery and return resources, customer-service facilities, privacy documentation, and company-identifying content. No conflicting legal-entity names are reported, and there is no adverse broker-reputation match.

- The homepage identifies the service as an online lingerie and clothing store supported by physical retail locations.
- The site's transport encryption uses a DV TLS certificate issued by YR2, valid to 2026-09-12.
- The service is hosted on AS210756 by EdgeCenter LLC in Russia.
- The assessed third-party broker dataset contains no matching adverse entry for the site.

What to Verify Next

Routine ecommerce due diligence should focus on confirming the applicable delivery area, return conditions, final price, and refund process before purchase. For material orders, the displayed company details and physical-store information may be reconciled with the transaction documentation, while customer-service channels can be confirmed through the site's published store information.

- The homepage provides dedicated delivery, return, store-location, customer-contact, and gift-certificate resources relevant to pre-purchase review.
- Six visible forms support contact, newsletter enrolment, registration, password recovery, phone-based authentication, and email-based authentication; no form submits sensitive information to an untrusted destination.
- Behavioral testing found no hidden forms, externally submitted password forms, clipboard interference, cloaking, or suspicious inline scripts.
- Both observed interaction runs completed successfully, with stable successful web responses and no console errors.

Summary Verdict

The site is a legitimate, established, and trustworthy ecommerce service. Its coherent commercial identity, mature operating footprint, clean reputation, and absence of contradictory security signals support normal interaction, including account login and standard purchases.

Infrastructure Integrity

The site resolves directly to two likely origin addresses and does not appear to use a CDN or WAF. Its identified EdgeCenter hosting environment, valid transport encryption, and resolved network posture provide sound baseline infrastructure integrity, although these technical controls are supporting safeguards rather than independent proof of business legitimacy.

Closing Assessment

Prospective customers may use the site normally, applying ordinary ecommerce care when reviewing order totals, delivery terms, and payment confirmations.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of defile.ru.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about defile.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
