Full analysis

Overview

The website is an established Russian online retailer selling women's, men's, and children's footwear, bags, and accessories through a priced catalogue, with nationwide delivery or collection from physical salons and revenue derived from ordinary retail sales, promotions, and a customer bonus programme.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behaviour, or other fraud indicators were observed. The long-established domain, sustained historical presence, clean external reputation, stable browser behaviour, and absence of deceptive credential or payment forms collectively support the site's authenticity. Historical records do not indicate suspicious repurposing or a material change from another business category.

- The domain registration record shows registration on 16 October 2008 (~17.8 years old), through registrar RD-RU, with expiry on 16 October 2026.
- The domain's archive record contains 261 snapshots spanning 21 May 2013–14 May 2026 (14 years tracked), with no archive evidence of suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-browser safety warning, and no reported abuse associated with the hosting address.
- Homepage interaction testing found no login form, hidden form, credential forwarding, cloaking, suspicious inline script, clipboard interference, or cryptocurrency-wallet activity.

Regulatory Verification Notes

The observed business model is conventional footwear and accessories retail, rather than a regulated financial, investment, or brokerage service; no financial licence is therefore indicated as necessary by the supplied site content. The available homepage evidence presents delivery, payment, warranty, returns, customer-service, and physical-salon references, although it does not conclusively establish the full legal-entity particulars available elsewhere on the site. This is a minor disclosure-verification point rather than evidence of illegitimacy, and no adverse broker association was identified.

- The homepage advertises nationwide Russian delivery, payment arrangements, product warranties, shopping policies, customer support, and physical retail locations.
- The homepage presents a standard retail catalogue with named footwear brands and prices denominated in roubles.

- No cryptocurrency, investment, brokerage, leveraged-trading, or yield-generating service is represented in the reviewed content.
- The site's transport encryption uses a YR1-issued domain-validated TLS certificate, valid until 30 August 2026.

What to Verify Next

Before placing an order, the purchaser should confirm the seller's legal name and applicable terms on the checkout, terms, or returns pages; ensure that the final price, delivery destination, refund conditions, and warranty coverage match the intended transaction; and independently confirm the selected physical collection point or official customer-service channel where fulfilment assistance is required.

- The homepage offers delivery across Russia as well as collection through physical salons, making fulfilment terms relevant to the chosen order method.
- The catalogue displays multiple brands and rouble-denominated prices, providing transaction details that can be reconciled at checkout.
- The site promotes a first-order registration discount and a customer bonus system, whose eligibility and redemption conditions should be reviewed before purchase.

Summary Verdict

The site is a legitimate, established, and trustworthy ecommerce operation. Its identity, historical continuity, reputation, page content, and observed behaviour converge without contradictory risk signals. Normal interaction, including registration, account login, and standard retail transactions, is appropriate.

Infrastructure Integrity

The site resolves directly to a single likely origin rather than operating behind a CDN or WAF. This is a conventional hosting posture and does not create a legitimacy concern, although it provides less origin shielding than an edge-protected deployment.

- The site is served from AS12695 (DINET-AS — LLC Digital Network, Russia) at a single resolved hosting address.
- Infrastructure analysis identified one likely origin address, no CDN edge addresses, and no trusted CDN or WAF layer.

Closing Assessment

Prospective customers may use the site normally, applying ordinary ecommerce practice by reviewing the final order terms and retaining transaction and fulfilment records.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about defiletto.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
