Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established adult-media directory presenting free explicit videos, image galleries, performer indexes, and categorized content, supported by advertising, affiliate referrals, webmaster partnerships, and promotions for paid adult services.

Scam/Impersonation Risk

No phishing, brand impersonation, conflicting legal identities, or other contradictory signals were observed. The homepage presents a conventional content-directory model rather than an investment, deposit-for-return, or financial-services proposition; it contains no login form, sensitive-input form, concealed form, cryptocurrency feature, or deceptive transaction mechanism. Its long-established registration, extensive historical record, strong global traffic footprint, and clean external reputation materially support the conclusion that it is the authentic, established site it appears to be.

- The domain registration record shows registration through URL SOLUTIONS INC. on 12 June 2006, making the domain approximately 20.15 years old; registration extends to 12 June 2027.
- The historical archive contains 5,000 snapshots spanning 8 December 2006 to 15 January 2018, covering 13 tracked years with no gap longer than one year; the available samples establish no suspicious repurposing or category conflict.
- The homepage contains no login form, hidden form, sensitive form, suspicious inline script, wallet interface, clipboard manipulation, or cloaking behavior.
- External reputation telemetry records zero malicious and zero suspicious detections, no phishing classification, no reported abuse, and a global traffic rank of 44,472.

Regulatory Verification Notes

The site presents itself as an adult-content publisher and directory, not as a regulated financial or investment service; consequently, the absence of a financial licence claim is consistent with its apparent business model. The homepage provides links for privacy, terms, DMCA, content removal, support, and age-recordkeeping information, indicating an established legal-policy framework. The supplied page evidence does not establish the specific operating legal entity or the completeness of those linked disclosures, which is a minor transparency note rather than evidence of illegitimacy. Private domain-registration details through Global Domain Privacy Services Inc. are an administrative arrangement and do not conflict with the site's identity.

- The homepage links to privacy, terms, DMCA, content-removal, support, and age-recordkeeping materials.
- The homepage identifies the service as an adult-media directory and makes no financial licence, investment, or deposit-return claim.
- Hosting telemetry records service from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).

- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid to 10 October 2026.

What to Verify Next

Institutional onboarding or commercial engagement should include review of the linked terms, privacy, DMCA, age-recordkeeping, and removal materials to identify the contracting entity, governing law, data-handling responsibilities, and content-removal process. Any advertising, affiliate, or webmaster relationship should also be governed by written terms that define payment, content provenance, age-assurance, and takedown obligations. Official support channels should be confirmed independently before establishing a business relationship.

- The homepage advertises a third-party premium offer priced at \$5 per month, supporting the presence of paid promotional or affiliate activity.
- The observed content map includes performer listings, videos, galleries, categories, and links to external adult-service promotions.
- The homepage exposes one advertising-network integration, consistent with the stated advertising-supported model.
- The available page evidence identifies webmaster partnerships as part of the site's monetization model.

Summary Verdict

The website is legitimate, established, and trustworthy, with convergent identity, provenance, reputation, traffic, and page-behavior evidence supporting a high-confidence assessment. No material contradiction or deceptive sensitive-interaction pattern was identified.

Infrastructure Integrity

The site is protected by a mainstream CDN and web application firewall. All six observed addresses were edge servers, with no origin candidate exposed; this reduces direct origin exposure and provides a meaningful security mitigation, although protective infrastructure alone is not proof of legitimacy.

Closing Assessment

Normal interaction, including ordinary browsing, account login where offered, and standard use, is appropriate; prospective commercial partners should apply routine contractual and compliance due diligence.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of definebabe.com.

- The request stayed on definebabe.com. It was not redirected to another domain. CLEAR
- Registration is published under URL SOLUTIONS INC.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-12. NOTED
- The earliest public archive of this site is from 2006-12-08. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about definebabe.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
