Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Definición.de is a Spanish-language educational reference website presenting dictionary definitions, random words, subject categories, and recent articles across science, humanities, society, health, and technology; its apparent model is informational publishing supported by ordinary website monetization.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or adverse external reputation findings were observed. The homepage presents ordinary reference content, contains no login or sensitive-data form, and shows no deposits, purchases, promised returns, or other financial-exploitation mechanics. The site's long-running, continuous history is consistent with its current educational purpose.

- The homepage provides definitions, subject categories, and recent educational articles, with no detected red flags.
- The domain has an established history of 18.401095140314855 years.
- The archive contains 5,000 snapshots spanning 2008–2025, covering 18 tracked years.

Regulatory Verification Notes

The available content supports an educational publishing model rather than a regulated financial or investment service. No license or regulatory registration is claimed in the supplied page evidence; this is a transparency item for formal institutional onboarding, not an indication of fraud. The available third-party context produced no matching broker record.

- The homepage is classified as an informational educational reference site with no evident financial-return or deposit activity.
- The site's external reputation checks recorded zero malicious and zero suspicious detections, with no blacklist finding.
- The site is served on AS13335 by CLOUDFLARENET - Cloudflare, Inc., US.
- Its TLS certificate is issued by WE1 using DV validation and is valid through 2026-10-23.

What to Verify Next

For formal procurement or partnership, confirm the publisher's legal identity and any applicable registration requirements through the site's own legal or contact pages and authoritative records. Routine browsing and standard site interaction are appropriate.

- The homepage supplies a coherent educational purpose across science, social sciences, culture, health, and technology categories.
- The analyzed homepage contains no sensitive form or untrusted destination.

Summary Verdict

Definición.de is a legitimate, established, and trustworthy informational website with no observed scam or impersonation contradiction. Its content, historical continuity, clean reputation, and technically valid delivery support normal interaction, including account login where applicable.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF protection, and all observed addresses are CDN edge infrastructure rather than exposed origin candidates. This reduces direct origin exposure and is a mitigating infrastructure signal, not independent proof of legitimacy.

Closing Assessment

Normal browsing and standard interaction are appropriate; formal institutional engagements should complete the organization's usual identity and registration checks.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about definicion.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
