## Key findings

---

- Automated classification: Not Scam.
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

DeinDeal is a Swiss online deals marketplace presenting discounted products, travel, hospitality, dining, leisure, wellness, education, and other consumer services through time-limited promotional offers. Its apparent business model is retail or commission-based facilitation of products and supplier-partner services.

### Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, behavioral, and reputation signals. The marketplace presentation is coherent, the reviewed pages show no phishing or brand-impersonation indicators, and external reputation checks identified no malicious or suspicious detections. The site's established operating history and clean technical reputation support a legitimate interpretation.

- The homepage presents a coherent ecommerce marketplace with multilingual navigation, customer support, legal-policy links, and supplier-partner information.
- The homepage contained no detected phishing indicators, hidden forms, sensitive-form redirects, or brand-impersonation signals.
- The domain has been established for 16.42984257357974 years; archival records contain 8 snapshots spanning 2010–2018 across 9 tracked years.

### Regulatory Verification Notes

The legal notices, terms, privacy policy, consent information, and supplier-partner references provide a meaningful disclosure framework for a consumer marketplace. The reviewed material does not present a specific regulatory license or registration number; for this ecommerce model, that is a transparency item for confirmation rather than evidence of deception. The site also has a top-tier global traffic footprint, clean external reputation, and established page authority, which reinforce its legitimacy without constituting a licensing determination.

- The legal and assistance sections link to Terms & Conditions, Privacy Policy, Legal Notices, and User Consent information.
- Hosting telemetry records AS13335, operated by Cloudflare, Inc.
- The site's TLS certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid through 2027-01-06.
- The site is within the global top one million by traffic ranking.

What to Verify Next

Before any regulated procurement or supplier relationship, the relevant contracting entity and any applicable consumer-commerce registrations should be confirmed through the appropriate Swiss registry or contractual documentation. Transaction terms, refund conditions, supplier responsibilities, and customer-support channels should also be checked on the site’s legal and assistance pages.

- The homepage links to customer-service information and a supplier-partner section.
- The information and assistance area provides operating hours, customer support details, FAQs, and “How does it work?” guidance.
- The legal notices and Terms & Conditions pages provide the appropriate locations for confirming contractual and disclosure details.

Summary Verdict

DeinDeal presents as a legitimate, established, high-trust ecommerce marketplace with no observed scam, phishing, or impersonation contradictions. The overall posture supports ordinary browsing, account access, account actions, and standard transactions.

Infrastructure Integrity

The site is protected by Cloudflare’s CDN and WAF, with observed traffic terminating on CDN edge infrastructure rather than exposing an origin address. This reduces direct origin exposure and is a mitigating security factor, although protective infrastructure alone is not proof of legitimacy.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; higher-value commercial engagements should follow the organization’s ordinary contractual and supplier-assurance process.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of deindeal.ch.

- The request stayed on deindeal.ch. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2010-02-25. CLEAR

- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about deindeal.ch at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
