

Is delbian.com.ar legit? TrustSniffer's high-trust assessment: 100/100

delbian.com.ar

Verdict

100

OUT OF 100

HIGH TRUST

delbian.com.ar appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Delbian is an online storefront for industrial safety apparel and footwear with product listings, offers, company information, phone numbers and physical store/warehouse addresses. The page appears to be a standard ecommerce site for B2B and B2C customers.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What delbian.com.ar served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Delbian is an online storefront for industrial safety apparel and footwear, presenting product catalogues, offers, professional clothing, safety footwear, and a direct-sales model serving both business and consumer customers, with additional claims of custom production, distribution, and post-sale support.

Scam/Impersonation Risk

No contradictions were observed. The site's commercial presentation is consistent with an ordinary industrial-safety retailer, and supplied external checks recorded no malicious detections, phishing indication, or confirmed blacklist hit. The domain name may superficially resemble Debian.org, but the homepage content is clearly focused on safety clothing and footwear rather than the Debian software project, and no impersonation evidence was identified. Interaction testing produced some external network activity and page-content changes, but did not identify cloaking, hidden forms, external password submission, wallet activity, or data-draining behavior; these observations do not establish malicious intent.

EVIDENCE

- The homepage identifies “Delbian - Seguridad Industrial” and presents industrial-safety categories, offers, and product listings rather than Debian software or services.
- Domain registration continuity dates to 2010, with an authoritative age of 15.81 years.
- Web-archive records show 71 snapshots spanning 2010–2026, covering 17 years.
- Supplied reputation checks record no malicious or suspicious detections, no phishing result, and no confirmed blacklist hit.

Regulatory Verification Notes

The available pages present company information, telephone numbers, and physical store or warehouse addresses, which is substantive commercial disclosure for a retail business. The site’s operator identity remains independently unverified, so those on-site representations should be treated as apparent business information rather than proof of the underlying legal entity. No financial or other regulatory licence is claimed in the supplied content; for this apparel-retail model, that is a transparency and applicability point rather than evidence of deception. The available third-party broker dataset contains no match, but this is contextual reputation information and not a licensing determination.

EVIDENCE

- The company-information and contact sections describe professional clothing services, distribution activity, telephone contact, and physical business locations.
- The site is hosted on AS27823, Dattatec.com, AR.
- Transport encryption uses a DV TLS certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2027-02-11.
- The supplied broker-reputation dataset records no matching entity.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the merchant’s legal identity, review the applicable delivery and return terms, and ensure that the selected payment method provides appropriate transaction protection. Any claimed brand-distribution relationship should be confirmed through the brand owner’s own published channel, and official contact routes should be validated independently rather than relying solely on information presented on the site.

EVIDENCE

- The site includes account registration/login functionality and a checkout cart, creating an ordinary credential and payment interaction surface.
- The homepage offers a downloadable product catalogue and describes manufacturing, distribution, and post-sale services.
- The site presents product offers and direct purchasing functions consistent with a conventional ecommerce model.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website operating with a low-risk ecommerce profile. The overall trust posture is high, while confidence in independently connecting the website to a specific real-world operator remains limited.

Infrastructure Integrity

The site resolves directly to a single hosting address on Dattatec.com rather than presenting a detected CDN or WAF edge layer. This is a conventional hosting arrangement and provides no special protective-layer assurance, but the resolved infrastructure and valid transport encryption are technically coherent with normal website operation.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; credentials or payment details should be used only after the merchant-identity, commercial-policy, and payment-protection checks described above are satisfactory.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of delbian.com.ar.

- The request stayed on delbian.com.ar. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2010-10-29. CLEAR
- It is hosted on AS27823, from a server in AR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about delbian.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
