

Is delcons.co.za a scam? TrustSniffer's high-risk assessment: 0/100

delcons.co.za

Verdict

0

OUT OF 100

CRITICAL RISK

delcons.co.za shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Very short placeholder page stating the domain is reserved for delcons.co.za. No links, forms, or interactive elements detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	10 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	1% confidence AbuseIPDB, 3 reports; shared hosting inflates reports	CLEAR
Domain age	29 days old Most scam domains are under a year old	RISK
Web archive	Archived since 2020 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR2	NOTED

The page as captured

<https://delcons.co.za/>

What delcons.co.za served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a parked placeholder page stating that the domain is reserved for “delcons.co.za”; it presents no product, service, transaction, account, or support functionality, and its apparent purpose is domain holding or future sale rather than an operating business.

Scam/Impersonation Risk

The site presents no visible impersonation, phishing form, or transactional mechanism, but this benign page content does not offset the decisive external threat evidence. The domain is confirmed as blacklisted by external sources, with malicious detections recorded by major security scanners; this constitutes a material contradiction and makes sensitive interaction inappropriate. Reports associated with the hosting IP are attributed to shared provider infrastructure, so they are contextual rather than proof that the parked page itself generated the reported activity. No conflicting legal-entity names or direct brand-impersonation indicators were observed.

EVIDENCE

- The homepage contains only the statement “Reserved for delcons.co.za” and no links, forms, login controls, or interactive elements.
- External reputation checks recorded 10 malicious detections from 15 evaluated results and a confirmed blacklist status across two external sources.
- The hosting IP, 129.232.137.128, has 3 abuse reports attributed to shared data-center infrastructure.

Regulatory Verification Notes

The page does not operate as a disclosed financial, commercial, or regulated service and provides no visible legal, licensing, or registration information. That is a transparency limitation for any future business activity associated with the domain, but it is distinct from the external security contradiction described above. Independent broker-reputation context produced no matching result. Identity verification remains unconfirmed; the page’s reference to “delcons.co.za” is an on-page reservation notice, not proof of the operator’s real-world identity.

EVIDENCE

- The homepage is a parked/placeholder page with no stated business model beyond reservation of the domain.
- No terms, privacy, company-information, licensing, or regulatory-disclosure pages are exposed through the observed site.
- Domain registration record: registered 2026 (~0.08 years old), with registrar Xneelo (Pty) Ltd and registrant organization Delcons Graphic Arts.
- Archive history: 26 snapshots spanning 2020–2025, covering 6 years tracked.

What to Verify Next

Before any future version of the domain is used for sensitive activity, an independent check should establish the operating entity, its jurisdiction, and any licensing or registration requirements applicable to the advertised service. Any proposed payment, investment, trading, or account workflow should be validated through an independently sourced corporate contact and an official regulatory registry rather than relying solely on information presented on the domain. Security teams should also confirm that the blacklist status has been reassessed after any material change to the site and hosting environment.

EVIDENCE

- The current homepage exposes no service or transaction workflow that can substantiate an operating business.
- The observed identity reference is limited to the reservation text on the homepage.
- Any future legal or licensing claims would need to be matched against an authoritative registry and independently sourced corporate records.

Summary Verdict

The overall posture is **critical sensitive-interaction risk**. The site is presently only a parked placeholder, but the confirmed blacklist status and malicious external detections create a substantial contradiction that overrides the limited benign behavior of the page. The operator’s real-world identity is also unconfirmed.

Infrastructure Integrity

The site resolves directly to hosting infrastructure operated by Xneelo (Pty) Ltd in South Africa, with no CDN or WAF edge identified and a likely origin address exposed. Transport encryption is present, but the certificate is domain-validated only; these controls provide basic connection protection and do not establish legitimacy.

Closing Assessment

Sensitive actions, including login, credential submission, payment, or financial activity, should not be undertaken unless the site’s security reputation, operator identity, and any applicable regulatory status are independently cleared through authoritative channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, external reputation.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuselPDB: 3 reports on hosting IP 129.232.137.128 (xneeloner Managed Network SSL, Data Center/Web Hosting/Transit), 1% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of delcons.co.za.

- The request stayed on delcons.co.za. It was not redirected to another domain. CLEAR
- Registration is published under xneelo (Pty) Ltd. CLEAR
- DNS for this domain is served by host-h.net, across 4 name servers. NOTED
- The registration is paid up to 2027-07-23. NOTED
- The earliest public archive of this site is from 2020-11-22. CLEAR
- It is hosted on Xneelo (Pty) Ltd, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about delcons.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
