

# Is delphiaonline.top safe? TrustSniffer's low-trust assessment: 25/100

delphiaonline.top

## Verdict

25

OUT OF 100

LOW TRUST

delphiaonline.top is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-29 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple directory index (Index of /) showing filenames and modification timestamps. No forms, social links, or commercial content present. Served by LiteSpeed Web Server.

## Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## At a glance

The page as captured

https://delphiaonline.top/

What delphiaonline.top served when TrustSniffer captured it on 2026-09-29. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

delphiaonline.top presents an auto-generated “Index of /” directory rather than a developed business website, listing server-side filenames and modification timestamps with no visible service, transaction flow, or commercial purpose.

Scam/Impersonation Risk

The site presents a **high-risk interaction profile** because external security intelligence records a confirmed blacklist status and multiple malicious detections, including detections from Fortinet, Kaspersky, and Sophos. These signals materially outweigh the otherwise limited page-level evidence, which found no login form, payment mechanism, wallet connection, phishing form, or visible brand impersonation. The site’s identity is not independently verified, and the available content provides no credible basis for associating it with a real-world operator. No identity contradiction between distinct legal entities was observed, but the confirmed blacklist and malicious detections warrant treating login, credential submission, financial activity, and downloading server-listed files as inappropriate.

#### EVIDENCE

- The homepage displays only “Index of /” and a file listing, with no identifiable business operator, service description, or customer-facing purpose.
- External reputation assessment records a confirmed blacklist and malicious detections from multiple security providers.
- The domain was registered on 2026-09-28 and is approximately one day old.
- Observed browser behavior recorded no login form, sensitive form, external submission, wallet connection, clipboard hijacking, or suspicious inline script.

#### Regulatory Verification Notes

The available page does not provide legal-entity details, licensing information, regulatory status, terms, privacy disclosures, or an accountable business contact. This is a substantial transparency gap for any prospective commercial or financial use, although the page itself does not claim to offer a regulated service. The registration record identifies Spaceship, Inc. as registrar and shows the registrant information as privacy-protected; this is an administrative limitation rather than proof of wrongdoing. The absence of a broker-dataset match provides no positive regulatory conclusion.

#### EVIDENCE

- The homepage contains only a directory index and does not expose legal, licensing, terms, privacy, or corporate disclosures.
- The domain registrar is Spaceship, Inc.; the registration record shows the owner and organization as “REDACTED FOR PRIVACY.”
- The site uses a DV TLS certificate issued by YE2, valid through 2026-12-27.
- The observed hosting infrastructure is AS13335, Cloudflare, Inc., registered through ARIN.

#### What to Verify Next

Before any interaction beyond passive inspection, an organization should confirm whether the domain has a legitimate business purpose through an independently sourced corporate identity, validate any claimed authorization with the relevant regulator, and confirm official contact channels through an offline or separately established route. Security controls should also block access to unknown files exposed by the directory listing and prevent credential, payment, or wallet-related interaction with the domain.

#### EVIDENCE

- The homepage exposes server filenames including “cgi-bin,” “def,” “defounder,” “mrdef,” and “php.ini,” rather than a controlled customer interface.
- The page has no forms, external links, social presence, service claims, or stated transaction process.
- The page is served as a directory listing by LiteSpeed Web Server over port 443.

#### Summary Verdict

The website has a low-trust posture with elevated risk for sensitive interaction. Its confirmed external threat detections, unverified identity, extremely limited public content, and lack of an evident legitimate business

purpose support a clearly cautionary assessment.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure of the underlying service, and all observed addresses were Cloudflare edge infrastructure rather than an identified origin. This protection supports transport and delivery resilience but does not establish that the website or its operator is legitimate.

Closing Assessment

The appropriate enterprise disposition is to restrict the domain from credential, financial, and file-transfer workflows pending independent identity, authorization, and technical validation.

Written analysis generated 2026-09-29 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.  
Registration and ownership rule:KF\_WHOIS\_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.  
Registration and ownership rule:KF\_WHOIS\_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.  
External reputation rule:EXT\_BLACKLIST\_CRITICAL

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of delphiaonline.top.

- The request stayed on delphiaonline.top. It was not redirected to another domain. 

CLEAR

- Registration is published under Spaceship, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-28. NOTED
- The earliest public archive of this site is from 2026-09-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about delphiaonline.top at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
