

Is demo.es safe? TrustSniffer's moderate-trust assessment: 65/100

demo.es

Verdict

65

OUT OF 100

MODERATE TRUST

demo.es is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Company website for 'DEMO Architectura' offering architecture, BIM, GIS, 3D scanning, multimedia and software training/distribution with multiple case studies and contact details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

DEMO

THE SCIENCE OF WHERE

What demo.es served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This is the DEMO Arquitectura corporate website, presenting architecture and engineering services together with BIM, GIS, 3D laser scanning, drone services, multimedia production, software distribution, consultancy, training, and project case studies. Its apparent business model is based on professional-services engagements, software resale, and training for architecture, engineering, construction, and public-sector clients.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there is no confirmed phishing, impersonation, blacklist, or identity-inconsistency signal. The homepage presents a coherent corporate-services profile, with substantial service descriptions, project categories, named software platforms, and contact details that are consistent with a professional architecture and engineering firm. One external detection marked the domain as malicious, but it was a single unconfirmed result and is outweighed by the absence of broader threat, phishing, or abuse indicators; it should therefore be treated as a limited reputational signal rather than a confirmed compromise or scam finding. Interactive testing observed substantial DOM changes and external network activity, but no wallet connection, wallet-drainer behavior, cloaking, hidden forms, clipboard hijacking, or suspicious inline scripts.

EVIDENCE

- The homepage identifies DEMO Arquitectura and describes BIM, GIS, facility management, multimedia, scanning, consulting, software, and training services.
- The homepage and contact area provide a Spanish telephone number and a company-domain contact address.
- External screening recorded 1 malicious result, while Google Safe Browsing reported no malicious status, blacklist status was false, and AbuseIPDB recorded 0 reports.
- Behavioral testing recorded 0 wallet-connect runs, 0 wallet-sensitive runs, 0 wallet-drainer runs, and no cloaking or hidden forms.

Regulatory Verification Notes

The site's apparent legitimacy is supported by a detailed corporate presentation and a business model that is commercially plausible for an architecture and engineering services firm. However, the real-world operator identity remains unverified, and the available pages do not clearly disclose a legal entity, registration details, or any applicable professional or regulatory licence. This is a transparency and verification gap, not evidence of fraud; the services described are not presented as a regulated financial offering. No matching broker-reputation record was identified, although that absence is contextual rather than a legal or licensing determination.

EVIDENCE

- The navigation includes Empresa, RSC, Cooperación al desarrollo, Medio Ambiente, Servicios, Proyectos, Software, Formación, Noticias, and Contacto.
- The homepage states that DEMO has "Más de 30 años" of experience in architecture, engineering, construction, management, GIS, and application development.
- The supplied site content contains no claimed licence authority or licence number.
- The site's hosting infrastructure is identified as AS197712, CDmon - 10dencehispahard, S.L., ES; its TLS certificate is DV-validated, issued by YR2, and valid to 2026-09-25.

What to Verify Next

Before a high-value contract, payment, or transfer of sensitive project information, the proposed counterparty should be matched to an applicable Spanish corporate or professional registry, and the contracting entity should be confirmed in formal documentation. Contact details should be validated through an independently sourced business record or an offline channel, and any software resale or training engagement should use a written quotation, clear terms, and payment protections appropriate to the transaction.

EVIDENCE

- The site presents a corporate-services model but does not supply a clearly verified legal-entity identifier in the supplied content.
- The homepage identifies multiple service lines and software brands, providing concrete subjects for confirmation during procurement.
- The contact page provides a direct telephone channel that can be compared with independently sourced business records.

Summary Verdict

The website has a **moderate-trust posture**: its substantial, coherent corporate content and lack of confirmed scam or impersonation contradictions support apparent legitimacy, while independent identity verification and disclosure clarity remain incomplete. Normal browsing and preliminary commercial assessment are reasonable, but the evidence does not establish the operator's real-world identity or support an unrestricted high-value trust decision.

Infrastructure Integrity

The site resolves directly to hosting associated with CDmon rather than a detected CDN or WAF, with two likely origin addresses identified. This provides less intermediary protection than a mainstream edge network, but the infrastructure is resolved, attributable to a named Spanish hosting provider, and accompanied by a valid transport-encryption certificate; infrastructure alone is not proof of legitimacy.

EVIDENCE

- Served from AS197712, CDmon - 10dencehispahard, S.L., ES.
- Hosting country: ES; registry: RIPE NCC.
- TLS certificate issuer: YR2; validation level: DV; valid to 2026-09-25.
- Infrastructure analysis identified 2 unique IPs, 0 edge IPs, and 2 likely origin IPs; no CDN was detected.

Closing Assessment

Proceed with ordinary business engagement only after the contracting party, transaction terms, and payment protections have been independently confirmed, with heightened care applied to sensitive or financially material actions.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Dynamic Interaction Caution

- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of demo.es.

- The request stayed on demo.es. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2001-02-23. CLEAR
- It is hosted on CDmon, from a server in ES. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about demo.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
