

Is demographer.com legit? TrustSniffer's high-trust assessment: 100/100

demographer.com

Verdict

100

OUT OF 100

HIGH TRUST

demographer.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Academic personal website for Griffith Feeney containing blog posts, presentations, white papers, publications, and contact information (CV, email, phone). No forms or transactional features detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What demographer.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

demographer.com is a personal academic website associated on its pages with Griffith Feeney, presenting demography research, blog posts, presentations, white papers, publications, a curriculum vitae, and contact information for an informational and potentially consultancy- or speaking-oriented purpose.

Scam/Impersonation Risk

No contradictions were observed: there is no indication of phishing, brand impersonation, malicious behavior, or a confirmed blacklist event. The site's consistent academic subject matter—including population studies, census analysis, mortality, life tables, and demographic methods—aligns with its stated personal/research purpose rather than a deceptive transactional model. The absence of login, payment, wallet, or sensitive submission functionality further limits the site's apparent abuse surface.

EVIDENCE

- The homepage is titled “Griffith Feeney’s Demography Website” and contains dated demography articles, presentations, and white papers.
- Technical behavior recorded two successful runs with stable HTTP responses, zero external XHR or POST activity, no hidden forms, no login form, and no wallet-connect or wallet-drainer activity.
- The domain was registered on 1996-12-24 and is approximately 29.67 years old through DNC Holdings, Inc.
- Archive records show 134 snapshots spanning 1999–2025, covering 27 years of tracked history, with no detected suspicious repurposing or semantic drift.

Regulatory Verification Notes

The pages describe a personal academic and professional information site, not a financial, brokerage, investment, or other regulated service. No license claim or regulated-service representation is presented; consequently, licensing is not a substantive issue for the site's apparent purpose, although any future consultancy or paid engagement should be assessed separately. The real-world operator identity remains independently unverified, so the site's self-description should be treated as evidence-consistent rather than conclusive proof of identity. Available external reputation checks returned no malicious or suspicious findings, and no broker-reputation match was identified.

EVIDENCE

- The site is hosted on AS26347 (DREAMHOST-AS – New Dream Network, LLC, US).
- The site's TLS certificate is issued by YR2 at DV validation level and is valid through 2026-10-17.
- The homepage, publication material, presentation listings, and CV/contact sections support a personal/academic site classification rather than a regulated financial-service presentation.

What to Verify Next

Before a paid consultancy, speaking engagement, or other consequential interaction, the prospective counterparty should independently confirm that Griffith Feeney is the intended person through an authoritative academic or professional source and confirm engagement terms through a separately obtained contact channel. Any payment should use a documented agreement and a payment method with appropriate dispute or buyer protection. If a future page introduces regulated services, investment activity, or financial solicitation, the relevant licensing and registration should then be checked directly with the applicable regulator.

EVIDENCE

- The site provides a CV and direct contact details that can be compared with independently sourced professional information.
- The content is publication- and presentation-oriented, providing a concrete basis for identity and affiliation checks.
- No transactional checkout or sensitive submission form was detected, so any proposed transaction would likely occur outside the site's observed interface.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. The classification is strong, but it does not independently prove the real-world identity of the operator.

Infrastructure Integrity

The site resolves to a single address hosted by DREAMHOST-AS – New Dream Network, LLC, in the United States, with no CDN or WAF edge layer detected. This is a conventional, identifiable hosting arrangement and provides basic infrastructure consistency, but hosting configuration alone is not proof of legitimacy.

Closing Assessment

Normal informational use is proportionate to the observed posture; credential or payment interactions should remain subject to ordinary independent identity, engagement-term, and payment-protection checks.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of demographer.com.

- The request stayed on demographer.com. It was not redirected to another domain. CLEAR
- Registration is published under DNC Holdings, Inc. CLEAR
- DNS for this domain is served by dreamhost.com, across 3 name servers. NOTED
- The registration is paid up to 2026-12-23. NOTED
- The earliest public archive of this site is from 1999-10-12. CLEAR
- It is hosted on DREAMHOST-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about demographer.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
