

Is denverpost.com legit? TrustSniffer's high-trust assessment: 90/100

denverpost.com

Verdict

90

OUT OF 100

HIGH TRUST

denverpost.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Regional news homepage with articles, sections, subscription and account controls, and a cookie/consent banner. Primary function is publishing journalism and monetizing via ads and subscriptions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

The Denver Post is a regional news publication presenting Colorado breaking news, sports, business, politics, entertainment, weather, and lifestyle coverage. Its apparent business model is an established advertising- and subscription-supported journalism service, with paid access and account-based features alongside editorial content.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious-domain, or blacklist finding. The homepage's content and functionality are consistent with a news-media service rather than a deceptive financial or credential-harvesting operation. Automated interaction did observe hidden forms, substantial external activity, and dynamic page changes, but the page analysis found no sensitive form, no external password form, no wallet activity, and no cloaking. The only adverse external signal was limited abuse reporting against a shared Automattic infrastructure address; the attribution indicates that the reports apply to shared provider infrastructure rather than establishing abuse by this website. The site therefore presents as an apparently legitimate, established publication, while its real-world operator identity remains independently unverified.

EVIDENCE

- The homepage presents editorial sections for local news, sports, business, politics, opinion, entertainment, weather, and lifestyle, with no detected red-flag content or brand-impersonation indicators.
- The domain was registered in 1995 and is approximately 31.44 years old; the registration record identifies GoDaddy Corporate Domains, LLC as registrar.
- Historical records show 5,000 archive snapshots spanning 1996–2014, covering 19 tracked years.
- Automated testing recorded 2 hidden forms across 2 successful runs, 86 external XHR requests, 43 external POST requests, and 0 wallet-provider, wallet-sensitive, or wallet-drainer runs; the page analysis reported no sensitive form.

Regulatory Verification Notes

The site's presentation is consistent with a news publisher rather than a financial service requiring the type of licensing associated with trading, lending, or investment products. The reviewed content does not state a

licensing claim or registration number, so regulatory verification is not applicable as a financial-service finding but remains a limited disclosure consideration for confirming the publishing entity and subscription counterparty. A registration record associates the domain with MediaNews Group, which supports continuity but does not independently prove the real-world operator identity. The site's long registration history, established traffic footprint, clean reputation results, and valid transport encryption collectively support an evidence-consistent established-site assessment.

EVIDENCE

- The site is hosted on AS2635, operated by AUTOMATTIC - Automattic, Inc, US.
- The site's TLS certificate is issued by YE1, uses Domain Validation (DV), and is valid through 2026-10-03T18:10:05+00:00.
- The registration record lists MediaNews Group as the organization and a domain expiration date of 2028-03-11T04:00:00Z.
- The homepage contains subscription and account controls and an IAB TCF consent banner describing advertising, analytics, personalization, and data-storage choices.

What to Verify Next

Before credential or payment interactions, an independent check should confirm that the subscription counterparty and publisher identity correspond to the intended organization. Subscription pricing, renewal, cancellation, refund, and payment-protection terms should be reviewed through the site's formal terms and billing disclosures, and official contact channels should be confirmed through an independent route. Cookie and advertising-consent preferences should also be reviewed where the organization's data-handling requirements warrant it.

EVIDENCE

- The homepage offers "Subscribe Now" functionality and account-related controls, creating a payment and credential interaction surface.
- The consent banner provides controls to accept, reject, or customize non-essential storage and advertising purposes.
- The site's stated function is journalism supported by advertising, subscriptions, sponsored content, and classifieds rather than a financial product or investment service.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary browsing and standard site interaction. The conclusion is strong but does not independently verify the real-world operator identity.

Infrastructure Integrity

The site resolves to one likely origin IP, with no dedicated CDN or WAF vendor detected in the infrastructure record and no edge-IP distribution identified. The hosting environment carries a trusted protective-infrastructure classification, which is a mitigating signal only and is not proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, while independent confirmation of the publisher, subscription terms, and payment protections should precede credential or payment submission.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 192.0.66.2 (Automattic, Inc, Content Delivery Network), 2% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of denverpost.com.

- The request stayed on denverpost.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy Corporate Domains, LLC. CLEAR
- DNS for this domain is served by awsdns-63.net, across 4 name servers. NOTED
- The registration is paid up to 2028-03-11. CLEAR
- The earliest public archive of this site is from 1996-11-03. CLEAR
- It is hosted on AUTOMATTIC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about denverpost.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
