Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Spanish-language online portal of DeporTV, presenting Argentine and international sports journalism, match schedules, results, live and on-demand programming, television-distribution information, and broadcaster contact details as part of an established public sports-media operation.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other deceptive interaction patterns were observed. The site's sustained historical presence, Argentine government-domain context, consistent sports-media identity, clean external reputation, and absence of payment, credential, or wallet-connection mechanisms strongly support its legitimacy. Historical records do not indicate suspicious repurposing or a change to an unrelated business model.

- The homepage identifies DeporTV as "El Canal del Deporte Argentino" and contains substantial editorial coverage of football, motorsport, tennis, basketball, rugby, boxing, hockey, and other sports.
- The domain has 360 archive snapshots spanning 2013-03-13 to 2026-07-29, covering 14 tracked years; no suspicious repurposing or semantic drift was detected.
- WHOIS records show registration in 2017 (~9 years old) to CONTENIDOS PUBLICOS SOCIEDAD DEL ESTADO through NIC Argentina; the reconciled historical domain age is ~13.39 years.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-browser security warning, no abuse reports, and no detected threat signatures.

Regulatory Verification Notes

The site operates as a sports broadcaster and news outlet rather than a financial, investment, or transactional service, so the absence of financial-sector licensing claims is consistent with its apparent function. Its institutional identity is reinforced by registration to a named state-owned entity and use of Argentina's restricted government-domain namespace. The reviewed homepage does not expose detailed corporate or editorial-governance disclosures, but this is a minor transparency note rather than a legitimacy concern.

- The homepage describes a sports-news and broadcasting service and does not solicit payments, investments, deposits, or other regulated financial activity.
- The domain uses the Argentine government suffix `gob.ar`, identified as a verified sovereign namespace.
- The site is served from AS396982 (Google Cloud Platform — Google LLC, US).
- The site's transport encryption uses a DV certificate issued by RapidSSL TLS RSA CA G1, valid to 2026-12-19.

What to Verify Next

Organizations considering formal content syndication, advertising, procurement, or broadcasting arrangements should confirm the contracting entity and authorized representative through official institutional channels. Any proposed commercial terms should be documented through the entity’s established procurement or contracting process, with contact details independently matched to official records.

- The homepage provides broadcaster contact and television-distribution information, establishing channels that can be cross-checked for institutional engagements.
- The registration record names CONTENIDOS PUBLICOS SOCIEDAD DEL ESTADO as the domain holder.
- The reviewed homepage contains no sensitive forms, hidden forms, external password destinations, or account-credential prompts.
- Two successful behavioral observations found no cloaking, clipboard interference, wallet activity, suspicious scripts, or untrusted external requests.

Summary Verdict

DeportTV is a legitimate, established, and trustworthy public sports-media website. Its identity, provenance, content, reputation, and observed behavior converge without contradiction, supporting normal interaction, including account login and standard use where such functions are offered.

Infrastructure Integrity

The site resolves directly to a Google Cloud Platform address rather than operating behind a detected CDN or WAF, with one likely origin address observed. Mainstream cloud hosting and valid encrypted transport provide sound baseline integrity, although infrastructure protections alone are not proof of institutional legitimacy.

Closing Assessment

Prospective users may engage with the site normally; organizations entering a formal commercial relationship should apply their standard counterparty and contracting controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of deportv.gob.ar.

- The request stayed on deportv.gob.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by googledomains.com, across 4 name servers. NOTED
- The registration is paid up to 2026-11-13. NOTED
- The earliest public archive of this site is from 2013-03-13. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about deportv.gob.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
